This is exactly what information scientists aim for in creating structured, automated representations, called 'ontologies,' for managing information in fields such as science, government, industry, and healthcare. Currently, these systems are designed in a variety of different ways, so they cannot share data with one another. They are often idiosyncratically structured, accessible only to those who created them, and unable to serve as inputs for automated reasoning. This volume shows, in a non-technical way and using examples from medicine and biology, how the rigorous application of theories and insights from philosophical ontology can improve the ontologies upon which information management depends.

postman pat mrs goggins: *Children Reading Pictures* Evelyn Arizpe, Morag Styles, 2004-08-02 This book describes the fascinating results of a two year study of children's responses to contemporary picturebooks. Children of primary school age, from a range of backgrounds, read and discussed books by the award-winning artists, Anthony Browne and Satoshi Kitamura. They then made their own drawings in response to the books. The authors found that children are sophisticated readers of visual texts, and are able to make sense of complex images on literal, visual and metaphorical levels. They are able to understand different viewpoints, analyse moods, messages

and emotions, and articulate personal responses to picturebooks - even when they struggle with the written word. With colour illustrations, and interviews with the two authors whose books were included in the study, this book demonstrates how important visual literacy is to children's understanding and development. Primary and Early Years teachers, literacy co-ordinators and all those interested in children's literature will find this a captivating read.

postman pat mrs goggins: Masters of the Post Duncan Campbell-Smith, 2011-11-03 The origins of the Post Office go back to the early years of the Tudor monarchy: Brian Tuke, a former King's Bailiff in Sandwich, was acknowledged as the first 'Master of the Posts' by Cardinal Wolsey in 1512, and went on to build up a network of 'postmasters' across England for Henry VIII. Over the following five hundred years the Royal Mail expanded to an unimaginable degree to become the largest employer in the country, and the face of the British state for most people in their everyday lives. But it also faced the demands of an increasingly commercial marketplace. With the election of Margaret Thatcher in 1979, the possibility of privatising the Royal Mail has prompted passionate arguments - and has added immeasurably to the difficulties of running it. In charting the whole of this extraordinary story, Duncan Campbell-Smith recounts a series of remarkable tales, including how postal engineers built the first programmable computer for the wartime code-breakers of Bletchley Park and how the Royal Mail managed to successfully continue delivering post to the front lines during two world wars, but also how they failed to avert the Great Train Robbery of 1963. He brings to life many of the dominant personalities in the Royal Mail's history - from Rowland Hill, who imposed a uniform penny post and set the great Victorian expansion on its way, to Tony Benn who championed the modernisation of the service in the 1960s and Tom Jackson who led the postal workers' biggest union through fifteen frequently stormy years up to 1982. This is the first complete history of the Royal Mail up to the present day, based on its comprehensive archives, and including the first detailed account of the past half-century of Britain's postal history, made possible by privileged access to confidential records. Today's debate over the future of the Royal Mail is shown to be just the latest chapter in a centuries-old conflict between its roles raising revenue and serving the public. Will its employees remain, like Brian Tuke's postmasters, servants of the Crown? This book could hardly appear at a more timely moment.

It also explores the world of celebrity dolls including stars such as Shirley Temple and Mae West, pop star dolls including Michael Jackson and Cher, and dolls representing royalty. Written by leading doll expert, Susan Brewer, the author of *British Dolls in the 1950s* and *British Dolls in the 1960s*, the book starts with a series of essays setting dolls in context and exploring their role in popular culture. The main part of the book is an

impressive A-Z of famous dolls, with symbols to show in which field they became famous (e.g. cartoons, toys or comic strips). The stories behind each of the dolls are told, including the tragic tale of Raggedy Ann and how a little girl inspired one of the most iconic character dolls of all time. A must-buy book for everyone who has ever own or collected dolls or is interested in popular culture. Did you know? The author of Raggedy Ann, Johnny Gruelle, was a vehement anti-vaccination campaigner after his young daughter died when she was vaccinated at school without his consent. Angela Rippon created the Victoria Plum doll series based on a plum tree in her garden. Holly Hobbie is an author and illustrator who named the famous patchwork-wearing little girl after her. It became a popular doll in the 1970s.
