The accident caused his bio-monitor computer to break, and he is left with only The Hab, hydrazine, a generator, and potatoes to keep him alive. Watney, described as a competent man, is not the type of person to give up so easily, however. He quickly finds a way to grow potatoes in The Hab using hydrazine to create water. the martian andy weir book: Andy Weir's the Martian Summary and Review Ant Hive Media Staff, 2015-09-30 This is a Summary of Andy Weir's The Martian.Six days ago, astronaut Mark

Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive-and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old human error are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills-and a relentless, dogged refusal to quit-he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him? Available in a variety of formats, this summary is aimed for those who want to capture the gist of the book but don't have the current time to devour all 387 pages.
