diary of a spider pdf: Serbian Paramilitaries and the Breakup of Yugoslavia Iva Vukušić, 2022-09-30 This is the first book to offer a comprehensive analysis of the emergence, nature, and function of Serbian paramilitary units during the violent breakup of Yugoslavia. The book investigates the nature and functions of paramilitary units throughout the 1990s, and their ties to the state and President Slobodan Milošević. The work relies on the archives of the International Criminal Tribunal for the former Yugoslavia in The Hague, which conducted dozens of trials relating to paramilitary violence, and records from judicial proceedings in the region. It discusses how and why certain important paramilitary units emerged, how they functioned and transformed through the decade, what their relationships and entanglements were with the state, the Milošević regime, and organized crime. The study thus investigates the interrelated ideological, political, and social factors and processes, fueling paramilitary engagement, and assesses the impact of this engagement on victims of paramilitary violence and on the state and society for which the units purportedly fought. It argues that coordinated action by a number of state institutions gave rise to paramilitaries tasked with altering borders while maintaining plausible deniability for the sponsoring regime. The outsourcing of violence by the state to paramilitaries led to a significant weakening of the very state these units and their sponsors swore to protect. The book also analyzes differences between the units and how they attacked civilians, arguing that the different forms of violence stemmed not only from the function they fulfilled for the state but also the ways in which they were set up and operated. The final chapter brings the different strands of the argument together into a coherent whole, suggesting avenues for further research, in the former Yugoslavia and beyond. This book will be of much interest to students of ethnic conflict and civil war, war crimes, Balkan politics, and International Relations in general.

diary of a spider pdf: The Cinema and the Origins of Literary Modernism Andrew Shail, 2012-11-12 Modernist writing has always been linked with cinema. The recent renaissance in early British film studies has allowed cinema to emerge as a major historical context for literary practice. Treating cinema as a historical rather than an aesthetic influence, this book analyzes the role of early British film culture in literature, thus providing the first account of cinema as a cause for modernism. Shail's study draws on little-known sources to create a detailed picture of cinema following its 'second birth' as both institution and medium. The book presents a comprehensive account of how UK-based modernism originated as a consequence of—rather than a conscious aesthetic response to—this new component of the cultural landscape. Film's new accounts of language, endeavor, time, collectivity and political change are first considered, then related to the patterns that comprised modernist texts. Authors discussed include Ford Madox Ford, Joseph Conrad, Wyndham Lewis, Ezra Pound, H.D., James Joyce, Virginia Woolf and Dorothy Richardson.

diary of a spider pdf: Haunted by the Civil War Shirley Samuels, 2025-10-28 How the legacy of the Civil War—as presented by writers, poets, and artists of the time—has shaped American visions of democracy In *Haunted by the Civil War*, Shirley Samuels explores the work of Walt Whitman, Emily Dickinson, Herman Melville, Frederick Douglass, Charlotte Perkins Gilman, and

others to investigate the long cultural shadow of America's cataclysmic sundering. Juxtaposing these texts with images—ranging from paintings by Winslow Homer to newspaper and magazine illustrations of political controversies—Samuels argues that the Civil War still haunts our attitudes toward democracy. The recent toppling of Confederate monuments, the continuing protests over racial and sexual discrimination, immigration, and Indigenous land rights: each of these forms part of the war's legacy. Examining the fraught deliberations about an ideal American democracy in the early republic, Samuels turns to the language of sensation in the poetry of Melville, Dickinson, and Whitman alongside Lincoln's relation to the poetic and visual culture of his time. She considers the haunted afterlives of war in the work of Louisa May Alcott and Harriet Beecher Stowe as well as in popular nineteenth-century inspirational fiction. And she investigates the literature of men at sea (and on rivers, enabling both connection and escape), as seen in Melville and Mark Twain, while examining women's wartime work and experience, in writings by Gilman and Frances Harper. Why does the Civil War still haunt us? To find the answer, Samuels identifies not only the ghosts that cannot rest but also the cultural practices that name them.

diary of a spider pdf: Frontier Justice in the Novels of James Fenimore Cooper and Cormac McCarthy Daniel Davis Wood, 2016-06-22 James Fenimore Cooper and Cormac McCarthy are two of the most celebrated and influential writers of the American West. Both have written powerful narratives that focus on the disappearance of the nineteenth century frontier, and both show an interest in the dramatic ways in which the frontier gave shape to American culture. But is it possible that the kinship between these two writers extends beyond simply sharing an interest in this subject? Teasing out the implications of the recurrent allusions to Cooper's *Leatherstocking Tales* in the pages of McCarthy's Southwestern novels, this book finds Cooper and McCarthy engaged in a complex legal and ethical dialogue despite the centuries that separate their lives and their work. The result of their dialogue is a provocative, nuanced analysis of the effects of the frontier on the American justice system – and, for both writers, an expression of alarm at the violation of the principles upon which the system was established.

diary of a spider pdf: American Exceptionalism Reconsidered David P. Forsythe, Patrice C. McMahon, 2016-11-25 Is the US really exceptional in terms of its willingness to take universal human rights seriously? According to the rhetoric of American political leaders, the United States has a unique and lasting commitment to human rights principles and to a liberal world order centered on rule of law and human dignity. But when push comes to shove—most recently in Libya and Syria—the United States failed to stop atrocities and dithered as disorder spread in both places. This book takes on the myths surrounding US foreign policy and the future of world order. Weighing impulses toward parochial nationalism against the ideal of cosmopolitan internationalism, the authors posit that what may be emerging is a new brand of American globalism, or a foreign policy that gives primacy to national self-interest but does so with considerable interest in and genuine attention to universal human rights and a willingness to suffer and pay for those outside its borders—at least on occasion. The occasions of exception—such as Libya and Syria—provide case studies for critical analysis and allow the authors to look to emerging dominant powers, especially China, for indicators of new challenges to the commitment to universal human rights and humanitarian affairs in the context of the ongoing clash between liberalism and realism. The book is guided by four central questions: 1) What is the relationship between cosmopolitan international standards and narrow national self-interest in US policy on human rights and humanitarian affairs? 2) What is the role of American public opinion and does it play any significant role in shaping US policy in this dialectical clash? 3) Beyond public opinion, what other factors account for the shifting interplay of liberal and realist inclinations in Washington policy making? 4) In the 21st century and as global power shifts, what are the current views and policies of other countries when it comes to the application of human rights and humanitarian affairs?

diary of a spider pdf: Primordial Modernism Cathryn Setz, 2019-08-05 Brings ideas and animals together to shed new light on modernist magazine culture Tests the concept of 'primordial' modernism as a tributary of primitivism, Jungian thought, and fraught nationalisms Provides readings of Eugene Jolas's creative and critical works that place him centre-stage in modernist studies Moves between unpublished archival material, reception studies, and readings of overlooked authors Considers a wide range of modernist authors and artists as befitting to such a rich document Touches on contemporary scientific discourse as an aspect of animal studies This adventurous study focuses on experimental animal writing in the major interwar journal transition (1927-1938), which contains a striking recurrence of metaphors around the most basic forms of life. Amoebas, fish, lizards, birds - some of the 'lowest' and 'oldest' creatures on earth often emerge at the very places authors seek expressions for the 'newest' and the 'highest' in art. Discussing works by James Joyce, Henry Miller, Gottfried Benn, Eugene Jolas, Kay Boyle, Bryher, Paul Irujo and more, Cathryn Setz investigates this paradox and provides a new understanding of transition's contribution to twentieth-century periodical culture.

diary of a spider pdf: Vibrant Architecture Rachel Armstrong, 2015-08-17 This book sets out the conditions under which the need for a new approach to the production of architecture in the twenty-first century is established, where our homes and cities are facing increasing pressures from environmental challenges that are compromising our lives and well being. Vibrant architecture embodies a new kind of architectural design practice that explores how lively materials, or 'vibrant matter', may be incorporated into our buildings to confer on them some of the properties of living

things, such as movement, growth, sensitivity and self-repair. The theoretical and practical implications of how this may occur are explored through the application of a new group of materials. Characteristically, these substances possess some of the properties of living systems but may not have the full status of being truly alive. They include forms of chemical artificial life such as 'dynamic droplets' or synthetically produced soils. As complex systems, they are able to communicate directly with the natural world using a shared language of chemistry and so, negotiate their continued survival in a restless world. Vibrant architecture may create new opportunities for architectural design practice that venture beyond top-down form-finding programs, by enabling architects to co-design in partnership with human and nonhuman collectives, which result from the production of post natural landscapes. Ultimately, vibrant architecture may operate as an ecological platform for human development that augments the liveliness of our planet, rather than diminishes it.
