figurative language worksheets pdf with answer key: *"Fire I' the Blood"* Richard E. Mezo, 1999 There are great differences between the oral use of figurative language and its written use. Nevertheless, the only separately published textbook for figurative language is almost entirely concerned with oral figurative language, offering such examples as you have a heart of stone or you make my blood boil. Much, if not most, oral language consists of long, repetitious portions of cliché and platitude, and not surprisingly, the figurative language used follows the same pattern. Writing teachers generally ask their students not to use clichés and platitudes, even though they may (mistakenly, I think) advise students to write like you speak.

figurative language worksheets pdf with answer key: Teaching Children about Figurative Language and More Habakkuk Educational Materials, 2019-11-07 The purpose of this book is to familiarize students with various language terms and to help develop their skills as writers. In less than 50 pages, they will learn what constitutes a complete sentence, will learn about plot structure, and will become familiar with writing techniques that authors often incorporate into their writing, such as imagery, alliteration, and assonance. The four different types of sentences (imperative, declarative, interrogative, and exclamatory) will also be studied, and students will be able to differentiate between sentences written in the first person, second person, and third person. In addition, easy to understand definitions, examples, and colorful illustrations are provided to familiarize students with the terms personification, onomatopoeia, simile, metaphor, hyperbole, idiom, irony, oxymoron, acronym, antonym, and synonym. Moreover, students will learn how to distinguish between the often-confused words homonyms, homophones, homographs, and heteronyms. (Note that the pages that teach these language terms also provide the correct pronunciation and that there is a pronunciation guide included in the book; eBook readers also have the option of clicking the arrow to hear the pronunciation of the term audibly.) Besides the terms mentioned above, students will also learn when can should be used in a sentence in place of may and when I should be used in place of me. Several reproducible worksheets are also available to be used for individual practice, to assess student learning, or for a teacher to use for direct instruction purposes on the classroom screen. The practice test mentioned below may also be reproduced for non-commercial, classroom use. Most of the pages in this book take only a few minutes of instruction time. It is recommended that you introduce one new page to the students daily and that you spend at least one day a week briefly reviewing pages you have already studied. This will help students to retain the information and will also help to prepare them for the corresponding unit test designed specifically for this book. A practice test is included at the end of the book. The same practice test is also available online as a computer-based test. (Please read the preface of this book for additional information about the computer-based tests.) This book could be introduced to students as early as the first grade and used throughout elementary, middle, and high school. Actual testing of the content could begin as early as the 2nd or 3rd grade.
