genetics a conceptual approach pdf: *The Book of Affinitive Life* Lee Arnold Green, 2022-10-12 The Book of Affinitive Life and, in conjunction, The Book of Life Part 2 are mainly about life on the earth concerning hate as an affinitive life of unprovoked attacks by raw signals of hate uninvited. As a consequence of a shock attack of trauma, terror, or horror, respectively, in your conscious mind at the threshold level, you are thereby forced to run into your subconscious mind of darkness just below the threshold of consciousness of light for psychological cover, safety, or protection characterized by your emotions. In conjunction, you are involuntarily forced to express a

hate gene that is a bad gene that becomes a bad spirit principal part grudge, hate, or hatchet of hatred, and its bad spirit constituent part grudge, hate, or hatchet of hatred. For that reason, the name of this book is The Book of Affinitive Life and, in conjunction, the Book of Life. It is The Book of Affinitive Life to the Natural Side of Life, and the Book of Life to the Spirit Side of Life. It is called The Book of Affinitive Life as it refers to and relates to the natural side of life first, and then to the same degree, it relates to the spirit side of life second, which characterizes the Book of Life. Affinitive life is not one life you live but rather many individual lives as an integral part of your natural life by its acquired spirit grafted into your natural spirit. By means of which, addictive life is distinguished as not having roots in your natural spirit, and for that reason, it is just a natural process of cleanliness of addiction out of the brain as genotypic addiction in response to phenotypic addiction. Your spiritual life is no exception to the rule of the process of affinitive lives, because it too, like affinitive life, is an integral part of your natural life. On the contrary, your spiritual life centers on spiritual love for the Father, Son, and the Holy Spirit, whereas affinitive life of invited signals from a particular person, place, thing, activity, event experienced in the environment centers on affinitive love for whom or what it derived. This is what The Book of Affinitive Life and, in conjunction, The Book of Life Part 1 is all about. Otherwise, affinitive life centers on hatred of an unprovoked attack by a raw signal of hate uninvited from a particular person, place, thing, activity, or event experienced or witnessed. The Book of Affinitive Life Part 2 brings to light the impact affinitive lives of hatred have on our natural life and society in general as a hate spirit. Its only aim is violence, death, and/or destruction against you and/ or whom or what your principal part bad spirit hatred is for. Therefore, nature's principal remedy for hatred is to bury your entire bad spirit principal part grudge or hatred. All affinitive lives are lived out optionally in conjunction with natural life as an integral part, as a habitual lifestyle or habit in natural life of affinitive life. This book is to show you how hate functions in your life as a living spirit in response to Satan the devil as the prince of the air influences on it and homogeneous people, places, things, activities, or events experienced or witnessed. So as to evoke awareness in you and thereby give you a conscious effect in your subconscious mind to remind you of your unprovoked attack and by which stir up hatred within you.

genetics a conceptual approach pdf: Encyclopedia of Human Development Neil J. Salkind, 2006 Publisher description

genetics a conceptual approach pdf: The 21st Century Black History Lee Arnold Green Sr., 2022-05-23 Black History in the 21st Century: From the Atlantic Slave Trade in America to Its Impact on African Americans Today is mainly about the injustices suffered by African Americans in America, especially the impact of the Atlantic slave trade in America on the negro race today, to include people of color. The impact of the Atlantic slave trade in the twenty-first century is high-tech lynching in America, that is, without the noose around the neck of the African American. High-tech lynching is defined in this book as the following: There are two phases of high-tech lynching. The first phase is characterized by violence, death, and/or destruction by white racists, race haters, or white supremacists, practicing bad spirit principal part racist hatred of racism against African Americans on the streets, to include people of color. The practice of racism is the use of racial or racist epithets characterized by the sentiment of racial segregation, white cultural and political domination that characterizes discriminatory language and/or physical practice of racism that involves violence, death, and/or destruction against black Americans in America. These are racist incidents on the streets. That is the first phase of high-tech lynching in the twenty-first century in America. And then an African American takes his or her racist case to court for courtroom proceedings. This is the second phase of high-tech lynching in America in the twenty-first century, wherein the courtroom, the DA, or district attorney, become hairsplitters of the letter of the law and nitpick at the spirit of the law as to the alleged violation or crime to justify the action or bad behavior of racist white policemen or white supremacists, characterized by their bad spirit principal part racist hatred of racism. Therefore, high-tech lynching involves the judges of the courts in America that go along with their district attorney's travesty of justice or mockery of the justice system. To include the legislators who make the laws in America and oftentimes their designated juries based on their homogeneity of bad spirit principal part racist hatred. Therefore, high-tech lynching is the effect of America's Atlantic slave trade on African Americans today in this the twenty-first century, post-Jim Crow as a system of predatory laws and tyranny of racism practiced against African Americans.
