level blue vocabulary workshop: *Sharing the Blue Crayon* Mary Anne Buckley, 2023-10-10 Social and emotional learning is at the heart of good teaching, but as standards and testing requirements consume classroom time and divert teachers' focus, these critical skills often get sidelined. In *Sharing the Blue Crayon* , Mary Anne Buckley shows teachers how to incorporate social and emotional learning into a busy day and then extend these skills to literacy lessons for young children. Through simple activities such as read-alouds, sing-alongs, murals, and performances, students learn how to get along in a group, empathize with others, develop self-control, and give and receive feedback, all while becoming confident readers and writers. As Buckley shares, Every day we ask young children to respectfully converse, question, debate, and collaborate about literature, science, math problems, history, and more. That's sophisticated stuff and requires sophisticated skills. Social and emotional skills are essential to helping children communicate their knowledge and articulate their questions. We must teach students how to build respectful, caring classroom communities, where students are supported and fully engaged in the learning and everyone can reach their potential.- In this fresh and original book, Buckley captures the humor, wonder, honesty, and worries of our youngest learners and helps teachers understand how to harness their creativity and guide their conversations toward richer expressions of knowledge. Teachers of special populations will especially appreciate Buckley's successful strategies for reaching English language learners and children from high-poverty homes who may not have strong foundations for academic discourse. As Buckley reminds us, By understanding one another-orally and socially at first, then using those community-building exchanges to strengthen the skills of reading and writing-;we experience the authentic pride and sweet joys of learning, understanding, and connecting to one another.-

level blue vocabulary workshop: Connections James E. Katz, 2017-11-30 Perhaps no other technology has done so much to so many, but been studied by so few, as the telephone. Even as its physical size diminishes, the telephone is becoming more important. In *Connections*, now available in paperback, James E. Katz gives greater visibility to this important element in modern life. Katz examines how the telephone reveals gender relations in a way not predicted by feminist theories, how it can be used to protect and invade personal privacy, and how people harness telephone answering machines to their advantage. Katz's inquiry reports on obscene phone calls, the abuses of caller-ID technology, and attitudes toward voice mail. National data about cellular telephones are presented to show the extent to which beepers and car phones have become status symbols. Katz ranges from microsocial interaction to macrosocial theory, and from the family and personal levels of organization to that of large-scale industrial bureaucracies. The result of this investigation is a compelling mosaic spanning sociology and psychology, and organization and communication studies. These arresting portraits will offer profound insight to historians, students of American culture, and those concerned about the nature and direction of the emerging information society.
