Snort Cheat Sheet: Core Commands

Below are essential commands every user should know.

Starting Snort

```bash
sudo snort -c /etc/snort/snort.conf -i eth0
```

- `-c` specifies the configuration file.
- `-i` indicates the network interface.

Example:
```bash
sudo snort -A console -c /etc/snort/snort.conf -i eth0
```
- `-A console` outputs alerts directly to terminal.

Running Snort in IDS Mode

```bash
sudo snort -d -l /var/log/snort -h 192.168.1.0/24 -c /etc/snort/snort.conf
```
- `-d` logs packet data.

ps aux | grep snort
```
Kill process:
```bash
sudo kill
```

Understanding Snort Rules

Snort rules are the heart of its detection capabilities. They define what traffic to monitor and how to alert or block.

Rule Syntax Breakdown

```plaintext
alert tcp any any -> any 80 (msg:"HTTP GET detected"; sid:1000001; rev:1;)
```

- `alert` — action to take.
- `tcp` — protocol.
- `any any` — source IP and port.
- `->` — direction.
- `any 80` — destination IP and port.
- `( ... )` — options.

Common Rule Options

- msg — message shown on alert
- sid — Snort ID (unique per rule)
- rev — revision number
- content — pattern to match within payload
- pcre — Perl Compatible Regular Expression for complex matching
- threshold — limits alerts for repeated matches
- classtype — categorizes alert type

Creating Custom Rules

Place rules in custom rule files, e.g., `/etc/snort/rules/local.rules`.

Example: Detect FTP login attempts

```plaintext
alert tcp any any -> any 21 (msg:"FTP login attempt"; content:"USER "; sid:1000002; rev:1;)
```

Rule Management and Best Practices

Effective rule management is vital for minimizing false positives and ensuring accurate detection.

Managing Rules

- Use included rule files (e.g., community-rules, malware-rules).
- Regularly update rules to stay current with emerging threats.
- Disable or modify rules that generate false positives.

Testing Rules

```bash
sudo snort -T -c /etc/snort/snort.conf
```

Validate new or modified rules before deployment.

Organizing Rules

- Keep custom rules in separate files.
- Use descriptive `msg` and `sid` values.
- Document rule purpose for future reference.

Snort Output and Logging

Snort provides various output options to monitor alerts and analyze traffic.

Alert Modes

- Console: Immediate alerts on terminal (`-A console`)
- Unified2: Binary format suitable for SIEM integration
- Syslog: Send alerts to syslog server

Configuring Output

In `snort.conf`, specify output plugins:

```plaintext
output alert_syslog: LOG_LOCAL3 LOG_ALERT
output unified2: filename snort.u2, limit 128
```

Viewing Alerts

- Check logs in `/var/log/snort/`.
- Use tools like `Barnyard2` for advanced analysis.
- Use `Snorby`, `BASE`, or `Splunk` for visual dashboards.

Advanced Snort Techniques

Enhance your Snort deployment with these advanced features.

Preprocessors

Preprocessors analyze specific protocols or perform normalization.

Examples:
- `stream5` for TCP stream reassembly.
- `http_inspect` for HTTP protocol analysis.

- `ftp` for FTP protocol inspection.

Configuration:
```plaintext
preprocessor stream5_global: track_tcp yes, track_udp yes
preprocessor http_inspect: global, iis_unicode map 1252
```

Inline Mode for Prevention

Snort can run in inline mode to block traffic based on rules.

```bash
sudo snort -Q --daq afpacket -c /etc/snort/snort.conf -i eth0
```

Configure rules with `drop` actions to actively block threats.

Common Troubleshooting Tips

- Ensure correct network interface is specified.
- Check rule syntax and sid uniqueness.

Basic Rule Structure

```
action protocol source_ip source_port -> destination_ip destination_port (rule options)
```

Example:

```
alert tcp any any -> 192.168.1.0/24 80 (msg:"HTTP access detected"; sid:1000001;)
```

Common Actions

- `alert`: Generate an alert
- `log`: Log the packet
- `pass`: Ignore the packet
- `drop`: Drop the packet (IPS mode)
- `reject`: Reject the packet (IPS mode)

Protocols

- `tcp`
- `udp`
- `icmp`
- `ip`

Rule Options

- `msg`: Custom message displayed with alert
- `sid`: Signature ID (unique identifier)
- `rev`: Revision number
- `content`: Match specific string or pattern
- `nocase`: Case-insensitive match
- `pcre`: Perl-compatible regular expression match
- `references`: External references (e.g., CVE IDs)

Commonly Used Snort Rules and Patterns

Detecting Specific Attacks

- Detecting SQL Injection

```
alert tcp any any -> any any (msg:"SQL Injection attempt"; content:"SELECT"; nocase; pcre:"/(\%27)|(\')|(\-\-)|(\%23)|(#)/"; sid:1000002;)
```

- Detecting Buffer Overflow Attempts

```
alert tcp any any -> any 80 (msg:"Potential buffer overflow"; flow:to_server,established; content:"GET"; http_method; content:"A" 1000; distance:0; sid:1000003;)
```

(Note: Use of `content` with wildcards or regex for complex patterns)

Detecting Common Malicious Activities

- Ping Sweep (ICMP Echo Requests)

```
alert icmp any any -> any any (msg:"ICMP Echo Request"; itype:8; sid:1000004;)
```

- Scanning for Open Ports

```
alert tcp any any -> any 1:1024 (flags:S; msg:"TCP scan"; sid:1000005;)
```

Snort Preprocessors and Plugins

Preprocessors enable Snort to analyze protocol-specific traffic and perform additional inspection.

Common Preprocessors

- `stream`: Reassembles TCP streams, useful for detecting application-layer attacks
- `frag3`: Handles IP fragmentation
- `http_inspect`: Inspects HTTP traffic
- `ssl`: Handles SSL/TLS traffic

Example Snort Preprocessor Configuration

```
preprocessor http_inspect: global, iis_unicode_map 1252
preprocessor stream5: policy block
```

Output Modules and Logging

Snort can log detected events to various outputs:

- Unified2 (binary format, used with Barnyard2 for advanced logging)
- Syslog
- Alert files

- MySQL/PostgreSQL databases

Configuring Output

In `snort.conf`:

```
output alert_fast: /var/log/snort/alert.fast
output unified2: filename snort.u2, limit 128
```

Troubleshooting Common Snort Issues

- Snort not detecting traffic

- Check interface configuration
- Ensure correct network ranges in `snort.conf`
- Verify rules are active and loaded

- High false positives

- Fine-tune rules with more specific content and context

girl go bad. Kristel wanted to ride on the wild side. But then I got her pregnant. Now, the baby in her belly might start a war between cops and bikers. And she'll have to choose where her true loyalties lie. KRISTEL This is spinning out of control. I needed to taste some freedom. I thought hanging around the Black Knights MC would be fun. But I never expected to fall hard for their leader. Andre is nothing like the boys I'm used to. He's ripped and tattooed from head to toe. And his voice alone is enough to send the best kind of shivers racing down my spine. I want his touch. I crave his kiss. But I might get more than I bargained for. Because Andre doesn't do things halfway. He won't stop with just one moment, just one night with me. He wants me over, and over, and over again. And his kind of sin is as rough as it gets. ANDRE I allowed her in so she could be a pretty distraction. Normally, civilian girls in the clubhouse is a bad idea. They don't know how to keep their mouth shut and their legs open. But I make an exception for Kristel. She's got something I like: An innocence I want to destroy. But giving in to my temptation might turn out to be the disaster that blows everything to pieces. Because our sins come with consequences: Like, for example... an unexpected baby. And now, her past is coming back to bite us. The entire city police force is out for biker blood. They want to hurt me for what I did to their chief's precious little girl. Well, f**k it. Let them come. Kristel belongs to me now. And I'll do whatever it takes to protect what's mine.

snort cheat sheet: Cabin Fervor John E. Thompson, 2023-09-11 Every fall, Dad and his buddies drove 200 miles to Jack Hochlander's tiny, unheated Adirondack cabin, centrally located in the middle of nowhere, to hunt deer. In 1957 Dad became part-owner, making him the happiest man

on earth. Now, outside hunting season, he brought my brothers and me along, teaching us the ways of the woods - and how not to cook. We had an absolute blast. As Dad said, We don't have a lot of money, but we have a lot of fun. The cabin became my favorite place on earth, too. Given a choice, I'd take a weekend at the cabin over Christmas. I can't wait for the day you fellas do the driving, he'd say, sucking on a smoke, steering his latest jalopy up the crumbling old roads. I'll just relax, look out the window and watch the woods go by. I'm really looking forward to that. Twenty years later, on his sixty-third birthday, February 6, 1979, he got his wish - but I was the only driver. My brothers, wisely, chose not to come. I thought we'd have a great time, snowshoeing, swapping stories around the wood stove, but I never factored in his drinking. Saturday night, drunk, he challenged a group of reviled snowmobilers at the Deer Head Inn and barely escaped with his life. So much for our glorious weekend. After his untimely death at 73, his youngest son Graham took over the cabin. That didn't last long; directly across our road a huge new house was built, spoiling our serenity, wrecking our wilderness, and Graham was gone; now at long last, the place was mine. Like Dad, I started bringing my kids up. Would they feel the same magic Dad and I felt there years before?
