successful writing at work pdf: Radical Reporting Sara I. James, 2025-01-31 If I were giving out an award for 'book of the year' for internal audit professionals, I would certainly award it to her outstanding manuscript: *Radical Reporting: Writing Better Audit, Risk, Compliance and Information Security Reports*. - Richard Chambers, Former President and CEO, The Institute of Internal Auditors Most people dread writing reports; they also dread reading reports. What they don't realize is that the techniques that make writing more readable make it more powerful. This is especially relevant for professionals in areas such as audit, risk, compliance, and information security. This small volume provides the tools and techniques needed to improve reports. It does so through addressing crucial concepts all too often overlooked in the familiar rush to perform tasks, complete projects, and meet deadlines. These concepts - the role of culture in communication; the link between logic and language; the importance of organizing thoughts before writing; and how to achieve clarity - may seem academic or theoretical. They're not. Unless writers understand their own thoughts, actions, and objectives, they cannot hope to communicate them at all - let alone clearly. successful writing at work pdf: Reading, Writing, and Digitizing Alice Horning, 2013-01-16 *Reading, Writing, and Digitizing* offers a new theoretical proposal concerning expert and novice readers and writers based on the psycholinguistics of literacy. This book has five specific goals. First, it presents a theory of meta-reading and writing that describes what literacy experts are able to do with written text. They do what the word "meta" describes: go before and after, into and around, beyond and beside written text to understand and create meaning. Second, the case studies presented reveal differences between literacy novices and experts in terms of their awarenesses about texts and their skills; these are clarified as the discussion unfolds. Third, the book provides an analysis of the processing mechanisms people use and the features that texts contain that make literacy possible. A fourth goal is to examine how experts understand and produce texts in both

traditional and digital venues. Finally, the book ends with focused strategies for instruction that will be useful to any reader working with people engaged in literacy development. Readers of this book will be better equipped to support the literacy development of others through their enhanced understanding of the psycholinguistics of reading and writing and of the differences between literacy novices and experts.

Sadeghinia, Fatema Kermalli Walji, Mohammad Mesbahi, Islam Uddin, Zahir Walji, Morteza Rezaei-Zadeh, 2017-01-01 'Prophet Muhammad', writes Mehdi Aminrazavi in his introduction to this volume, 'was one of the first students of distance learning. He learned about revelation from God through the medium of Gabriel.' Drawing a symbolic correlation between the Prophet and twenty-first-century students participating in a new age of enlightenment offered by Internet technology, Aminrazavi and the contributors to this book explore the pearls and perils of introducing new technologies into Islamic Studies. Originally presented at the International Conference on Islamic Studies and E-Learning organised by The Islamic College and Middlesex University in London in 2014, the essays within E-Learning and Islamic Studies explore the interrelationship between Islamic Studies and e-learning from three different perspectives: the emerging issues presented by this new frontier, how technology can be used effectively within Islamic e-learning, and the importance of pedagogy and procedures in Islamic e-course delivery. While distance and e-learning can pose immense challenges, the contributions to this important and timely collection show that although dissemination of knowledge can bring with it contention, dissension, and conflict, Islamic embracing of the internet and mass communication is, to the contrary, a fulfilment of the Prophetic command to acquire knowledge from the cradle to the grave.
