1 12th dolls house furniture: *Hello Girls & Boys!* David Veart, 2015-02-01 Toys are fun—but they are also serious business, as David Veart makes clear in this remarkable story of New Zealanders and their toys from Maori voyagers to 21st-century gamers. Deploying the tools of archaeology and oral history, Veart digs through a few centuries of pocket knives and plasticine to take us deep into the childhoods of Aotearoa. His story explores how people made their fun on the far side of the ocean—the Maori and Pakeha learned knucklebones from each other; young Aucklanders established the largest Meccano club in the world; and Fun Ho!, Torro, Lincoln International, and Luvme helped to build a successful local toy industry under the shade of import protection. *Hello Girls & Boys!* covers the crazes and collecting, playtimes and preoccupations of big and little New Zealand kids for generations. With its memories of knucklebones and double happys, golliwogs and tin canoes, marbles and Meccano, Tonka trucks and Buzzy Bees, this is a seriously fun New Zealand toy story.

1 12th dolls house furniture: Childhood by Design Megan Brandow-Faller, 2018-04-19 Informed by the analytical practices of the interdisciplinary 'material turn' and social historical studies of childhood, *Childhood By Design: Toys and the Material Culture of Childhood* offers new approaches to the material world of childhood and design culture for children. This volume situates toys and design culture for children within broader narratives on history, art, design and the decorative arts, where toy design has traditionally been viewed as an aberration from more serious pursuits. The essays included treat toys not merely as unproblematic reflections of socio-cultural constructions of childhood but consider how design culture actively shaped, commodified and materialized shifting discursive constellations surrounding childhood and children. Focusing on the new array of material objects designed in response to the modern 'invention' of childhood-what we might refer to as objects for a childhood by design-*Childhood by Design* explores dynamic tensions between theory and practice, discursive constructions and lived experience as embodied in the material culture of childhood. Contributions from and between a variety of disciplinary perspectives (including history, art history, material cultural studies, decorative arts, design history, and childhood studies) are represented - critically linking historical discourses of childhood with close study of material objects and design culture. Chronologically, the volume spans the 18th century, which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children's use; through the 19th-century expansion of factory-based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household; towards the intersection of early 20th-century child-centered pedagogy and modernist approaches to nursery and furniture design; through the changing consumption and sales practices of the postwar period marketing directly to children through television, film and other digital media; and into the present, where the line between the material culture of childhood and adulthood is increasingly blurred.
