aa route map europe uk: A Man & A Pram Mark Cundy, 2011-06-23 People travel from London to New York every day - nothing unusual about that, but if your journey took you 14 months, you might rightly wish to seek compensation from the airline! However, Mark Cundy's journey was different; his was a walking odyssey of immense proportions, covering 5,500 miles between October 2004 and December 2005 across three continents, in aid of Cancer Research UK and its overseas equivalents. Facing a lonely, often gruelling trek, Mark encountered many setbacks and obstacles en route: limited resources, accommodation problems, language barriers, extremes of climate, red tape, cultural differences and health issues, and met plenty of 'angels' and a few 'devils' as his journey pressed on through Europe, across Russia and on to Australia and finally the USA. There were many times he stopped to wonder, "What am I doing?" But in true Forrest Gump style, he just kept on walking. This is an extraordinary story, told with immense humour, of true grit and determination against the odds to fulfil a dream that had been many years in the making, one that took the 'World Walker' through every gamut of emotion, from fear to triumph and desperation to sheer joy. It was a defining achievement. And to what does the 'pram' in the title refer? He didn't really take a baby with him, did he? Well, you'll just have to read it and see!

Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. Volume 6 covers these changes comprehensively, while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society—and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images. Hundreds of expert contributors provide both original research, often based on their own participation in the developments they describe, and interpretations of larger trends in cartography. Designed for use by both scholars and the general public, this definitive volume is a reference work of first resort for all who study and love maps.

aa route map europe uk: To the Baltic with Bob Griff Rhys Jones, 2005-01-13 In the summer of 2002, two profoundly amateur sailors, Griff and Bob, set off in an elderly yacht for Russia, because, on the map, it looked easier than sailing to Cornwall. They took Baines with them, as he knew how to mend the engine. And this is their story. Over four long months of applied bickering in a vessel no bigger than a London taxi, they visited most of the geographically interesting restaurants on the Baltic seaboard. They sailed, over, and, even at one point, onto the mysterious heart of the Nordic world. They pushed themselves to the very limits of human endurance, before finally agreeing to wash their sleeping bags on a cool cycle at number six. *To the Baltic with Bob* is the full account of their stirring journey through the longest heat wave the frozen north has ever suffered; of three men in search of the answer to a troubling question: can you really outmanoeuvre a mid-life crisis by running away to sea?

aa route map europe uk: Songs from the Suitcase Rosanna Moseley Gore, 2024-06-20 Rosanna Moseley Gore had a German Jewish father who escaped Nazi Berlin on a Kindertransport in 1939, a Russian mother who was born in Manchuria, and a beloved Russian grandmother who fled her homeland during the post-revolution civil war. Her childhood in London was unusual. Driving holidays in Europe were normal, friends and family with strong accents were normal, baked beans and rice pudding were not. When a huge family archive of letters, photographs and documents came to her after her parents died, she realised she had a story to tell . . . of individuals and of how huge world events act upon them. The 'songs' resonate as much now as they did when they were first stashed away in the suitcase. "This is a gem of a memoir; sparkling, multifaceted, and full of depth and colour. At once a memorial and a meditation, it celebrates one unique family, and the power of ties that bind." – Heidi Thomas, screenwriter.

2021-02-10 Europe is getting closer. So are European social sciences. However, this is easier done in theory development and central research questions. When it comes to data the mutual understanding is far from perfect, due to a lack of knowledge about the data bases of the respective countries and the EU in general. This is particularly true when it comes to the regional level. This volume will help to improve the insight into the rich stock of European datasets which cover any kind of regional information. Many institutions ranging from statistical offices to more academic research centres and commercial enterprises report their offerings with special emphasis on the regional level (e.g. European Community Household Panel, European Social Survey, Labour Force Survey). Central categories such as NUTS and LAU are explained and discussed. In addition, typical examples of socio-economic cross-border and multi-level studies highlight the power of a regionalized European perspective. Furthermore, information about special tools for such type of analysis is included in the volume.
