question. This will ensure success in your Psychology examinations as it has done for my students. I teach both GCSEs and A levels and I am a qualified and experienced teacher and tutor of over 18 years standing. I teach, write and provide independent tuition in central and west London. I graduated from the Universities of Liverpool and Leeds and I obtained first class honours in my teacher training. I also write academic resources for the Times Educational Supplement. One of the most common questions my students have is: How do I get an A star in my exam? I have sought out model answers over the years which concentrate on how much time you should spend on each question, how the Assessment Objectives are met, and how many words need to be produced for each question. Failing to find this or even a concise layout of what is in each paper for AQA Psychology; I set about creating the answer to this real need. This book is the answer to this question and answers a real need that remains sadly unmet for the vast majority of students as you need to see it to be it (in this case - an A Star student). With coursework a thing of the past, your exams have never been more important with your entire grade decided by your exams and therefore your future place at university; which is the springboard to your future. Sadly, in addition to this, there has been so much disturbance and missed teaching time over the last couple of years too but this book will give you a head start. As a tutor I have often had extreme time pressures to give students the best chance in their exams with very limited teaching time available. This collection of exam answers is the best answer to these unavoidable problems. This book is packed with in-depth exemplar answers that demonstrate what A star exam answers look like on the full Psychology course. With a distinct focus on AQA's Assessment Objectives and the AQA Mark Scheme criteria these answers clarify the exam requirements and demonstrate how to construct full mark answers. The exam answers in this book push you towards your highest level and help you to remember what you have learnt in a practical and effective way; thus, demonstrating how to get every mark from the examiners! Through clear examples which demystify how to write the perfect answers, you can achieve A's and A Stars in the 2022 and 2023 Psychology A level examinations! My tuition students have been fortunate enough to attain places to study at Oxford, Cambridge and Imperial College, London and other Russell Group Universities. The students have done very well in their examinations and one Psychology student even obtained full UMS marks in their Psychology examinations. I hope and know that my Psychology books can enable you to take the next step on your academic journey. The resources and information in this book WILL help you get an A or A star in your AQA A Level Year 2 Psychology examinations, as they have done, and will continue to do so, for my students. Very best wishes for your examinations! Joseph This book is not endorsed by or affiliated with AQA. I am simply a teacher/tutor whose students have received A's and A stars in AQA Psychology AS and A level examinations for many years following the methods and model answers outlined in this book.
