bear novel marian engel: Marian Engel's Notebooks Christl Verduyn, 2006-01-01 Marian Engel emerged as a writer during that period in Canada when nationalism increased and "new feminism" dawned. Although she is recognized as a distinguished woman of letters, she has not been widely studied; consequently we know relatively little about her and her craft. The material collected in *Marian Engel's Notebooks*: "Ah, mon cahier, écoute..." is a major step in redressing that neglect. Extracts carefully chosen by Christl Verduyn from Marian Engel's forty-nine notebooks — notebooks Engel began in the late 1940s and which she maintained until her death in 1985 — track Engel's creative development, illustrate her commitment to the craft of writing and document her growth as a major Canadian writer. The notebooks also portray Engel's surprising leaps of logic, her fascination with the bizarre, the eclecticism of her reading and the depth and variety of her thinking. Finally, they present moving documentation of a woman facing cancer and early death. Christl Verduyn's illuminating introductory discussions to each of the notebooks unobtrusively guide us in the reading of these sometimes difficult writings. *Marian Engel's Notebooks*: "Ah, mon cahier, écoute..." leaves readers with a vivid sense of Canadian culture during the 1960s and 1970s. It provides insight into the literary life of one of Canada's significant woman writers, including her connections with other Canadian writers, and will be of special interest to scholars working in the field of literature.

Alice Higgs engages with on-going debates regarding reconciliation by demonstrating that it is imperative to critique settler colonial environmental frameworks and place autonomy back into Indigenous communities by bringing Indigenous practices of custodianship and relationality to bear more generally. This book also develops a number of conversations in animal studies in relation to the politics of representation. Higgs studies a range of canonical Canadian authors, demonstrating a progress across the period in which it is possible to identify the emergence of a literary pro-animal turn.

Canada is not one nation, but three: English Canada, Quebec, and First Nations. Yet as a country Canada is very successful, in part because it maintains national diversity through bilingualism, multiculturalism, and federalism. Alongside this contemporary openness Canada also has its own history to contend with; with a legacy of broken treaties and residential schools for its Indigenous peoples, making reconciliation between Canada and First Nations an ongoing journey, not a destination. Drawing on history, politics, and literature, this *Very Short Introduction* starts at the end of the last ice age, when the melting of the ice sheets opened the northern half of North America to Indigenous peoples, and covers up to today's anthropogenic climate change, and Canada's climate politics. Donald Wright emphasizes Canada's complexity and diversity as well as its different identities and its commitment to rights, and explores its historical relationship to Great Britain, and its ongoing relationship with the United States. Finally, he examines Canada's northern realities and its northern identities. bear novel marian engel: Ending the War Between Humanity and Nature Patrick C. Lee,

2020-08-19 This book offers plausible explanations for people's puzzling unwillingness to address the human-nature interactions that have led us to the precipice that is climate change today. Humanity and nature are at war; the evidence is all around us: catastrophic weather events, rising sea levels, extinction of species, famine, wildfires, melting polar ice, millions of environmental refugees, and toxic pollution of air, water, and soil. The list goes on and on. What is causing this war, and how can it be stopped? Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions? This book takes the question—and its answer—to a deeper level. It argues that the root cause of our war on nature might be found in the time-honored, historically deep myths, narratives and stories we tell ourselves—and have been telling ourselves for centuries—about humanity's place in (or out of) the natural world.

bear novel marian engel: **Women's Movement** Heidi Slettedahl MacPherson, 2021-07-26 *Women's Movement* critically explores the transgressive potential of feminist escape narratives and argues that they are, almost by definition, radically different from paradigmatic male escape narratives. While definitions of escape are necessarily broad, they have too often excluded the ambiguous escape – the escape most closely associated with the female. Indeed, feminist escape narratives often resist a happy ending, and *Women's Movement* argues that these narrative closures reflect the changing face of feminism, as it sheds its old certainties, is faced with a monumental "backlash" and is refigured as the potentially less threatening "postfeminism". Resisting the automatic association of "escape" with "escapist," *Women's Movement* analyzes male adventure and quest narratives, including *Moby-Dick*, *The Adventures of Huckleberry Finn*, *Blood Meridian*, and *Deliverance*, before turning to a range of feminist texts. While being the first book to give critical attention to some postfeminist novels, *Women's Movement* more often acts as a channel for offering different ways of approaching familiar feminist texts, including, among others, Marian Engel's *Bear*, Atwood's *Surfacing* and *The Handmaid's Tale*, Joan Barfoot's *Gaining Ground* and *Dancing in the Dark*, Anne Tyler's *Earthly Possessions* and *Ladder of Years*, Marilynne Robinson's *Housekeeping*, Erica Jong's *Fear of Flying* and Margaret Laurence's *The Diviners*.
