Central to Schulting's argument is the claim that all human experience is inherently self-referential and that this is part of a self-reflexivity of thought, or what is called transcendental apperception, a Kantian insight that was first apparent in the work of Christian Wolff and came to inform all of German Idealism. In this rigorous text, Schulting establishes the historical roots of Kant's thought and traces it through to his immediate successors, Karl Leonhard Reinhold, Johann Gottlieb Fichte and Georg Wilhelm Friedrich Hegel. He specifically examines the cognitive role of selfconsciousness and its relation to idealism and situates it in a clear and coherent history of rationalist philosophy.

come outside with pippin: Hollywood Sports Movies and the American Dream Grant Wiedenfeld, 2022 Through the heart of Hollywood cinema runs an unexpected current of progressive politics. Sports movies, a genre that has flourished since the mid-seventies, evoke the American dream and therefore represent the nation to itself in idealized form. Once considered mere credos for Reaganism's fantasies of an atomized society, movies from Rocky (1976) to Ali (2001) dream of democratic participation and recognition more than individual success, for in every case, off-field

relationships take precedence over on-field competition. Arranged chronologically, *Hollywood Sports Films and the American Dream* is a critical study of six major sports films that re-tells the story of multiculturalism's gradual adoption in the latter third of the 20th century and rewrites contemporary understandings of the sports film. For author Grant Wietenfeld, the mainstream's first minority heroes are paradoxically white ethnic, rural, working-class men, exemplified by *Rocky*, *Slap Shot* (1977) and *The Natural* (1984) and Black, brown, and women characters follow in *White Men Can't Jump* (1992), *A League of Their Own* (1992), and *Ali*. But despite their insistence on community and diversity these popular dramas show limited faith in civic institutions and point to the limits of inclusion and participation in the post-Civil Rights era. Hannah Arendt, Jeffrey Alexander, and others inform Wietenfeld's original analysis and commentary on the political significance of popular culture as he insists on the cinema's capabilities as an engine for democracy untethered from more conventional 'democratic' institutions. Reading these familiar movies from another angle paints a fresh picture of how the United States has imagined democracy since its bicentennial and renews the political efficacy of one of the most popular genres in film history.

Lanning, 2013-10-10 This book is a critical analysis of a selection of Adorno's work framed by four essential concerns: 1) Adorno's method of analysis; 2) the absence of a theory of social change; 3) the relationship of his approach to the dialectics of Hegel and Marx, particularly, to others in and around the Frankfurt School (Benjamin, Kracauer, Marcuse), and in contrast to scholars such as Lukács and Bloch; and 4) Adorno's use of his approach with respect to jazz, popular music, radio and pro-fascist propaganda of the 1930s and 40s as an instrument to disparage the working class. The argument is not an affirmation of Adorno's work, but argues against the significance of aspects of his theoretical perspective.
