oxford handbook for general practice: Oxford Handbook of Public Health Practice David Pencheon, 2006 This is a practical public health book - written by public health practitioners for public health practitioners. It introduces learning practitioners to the early phases of approaching a public health issue, details why an issue is important and exactly how it can be analysed and addressed. It deals not only with the technical issues, but crucially with how those technical issues can be implemented in order to improve the health of the population directly, or via one of many important causal pathways (quality of health care design and delivery). It is written by experienced, internationally known practitioners of public health.

oxford handbook for general practice: Oxford Handbook of Rehabilitation Medicine Manoj Sivan, Margaret Phillips, Ian Baguley, Melissa Nott, 2019-10-07 The Oxford Handbook of Rehabilitation Medicine is designed to provide concise information on rehabilitation aspects of long-term medical conditions affecting adults. The book has two sections, one on clinical symptom-specific approaches and another on condition-specific approaches. The clinical approach section outlines the management of common symptoms encountered in rehabilitation settings. The section on specific conditions provides information that will enable the reader to put the symptoms in context with the condition and provide direct management in a comprehensive and holistic manner. As the practice in rehabilitation goes beyond dealing with condition specific symptoms and is more focused on problem solving, the handbook provides a solid grounding in managing common practical problems in functions such as mobility, cognition, sex, relationships and work productivity. The conditions covered include neurological, musculoskeletal, neuromuscular, cardiac, pulmonary, cancer, vascular, trauma and burns. The latest advances from the field of orthotics, prosthesis, wheelchairs, technical aids and rehabilitation technology are included. The content and layout within each chapter and handbook as a whole attempt to capture all the aspects of WHO ICF

biopsychosocial model for health conditions. This Handbook, although aimed at medical doctors in the specialist area of Rehabilitation Medicine (also known as Physical and Rehabilitation Medicine in some countries), will prove useful to other members of the multidisciplinary rehabilitation team such as physiotherapists, occupational therapists, nurses, psychologists, speech and language therapists, dieticians, support workers and any other allied healthcare professionals working in rehabilitation of chronic conditions. The Handbook will also appeal to doctors in the related specialties like Neurology, Orthopaedics and Trauma, Palliative Medicine, Geriatrics, Pain Medicine and Sports and Exercise Medicine.

oxford handbook for general practice: The Study Guide for General Practice Training Tim Swanwick, Nava Chana, 2003 This guide is intended for individuals training in general practice as well as for their trainers, tutors and educational supervisors.
