Incredibly, the largest single gathering of Irish folk songs had been almost inaccessible because, originally newspaper based, it was available in only three libraries, in Belfast, Dublin, and Washington D.C. Sam Henry's "Songs of the People" makes the music available to a wider audience than the collector ever imagined. Comprising nearly 690 selections, this thoroughly annotated and indexed collection is a treasure for anyone who performs, composes, studies, collects, or simply enjoys folk music. It is valuable as an outstanding record of Irish folk songs before World War II, demonstrating the historical ties between Irish and Southern folk culture and the tremendous Irish influence on American folk music. In addition to the songs themselves and their original commentary, Sam Henry's "Songs of the People" includes a glossary, bibliography, discography, index of titles and first lines, melodic index, index of the original sources of the songs and information about them, geographical index of sources, and three appendixes related to the original song series in the Northern Constitution.

song on my own: *Art and Human Development* Constance Milbrath, Cynthia Lightfoot, 2013-05-13 This interdisciplinary volume explores art, its development, and its role in the construction of knowledge. Presenting theory and research on artistic development as a cultural and creative endeavor, contributors examine the origins of human art during the Paleolithic cultural revolution, as part of a modern cultural transformation, in the growth of a creative artist, and in developing children. Target chapters expressing the disciplinary perspectives of psychology, archaeology, communications, education, and the performing arts are followed by commentaries from internationally acclaimed scholars of human development. Part 1 explores how cultures harness and exploit the arts to give expression to values, social practices, and traditions. This section traces the emergence of new art forms that arose during social unrest, including the symbolization of spiritual beliefs expressed on the walls of Paleolithic caves, and the racial identity and cultural values expressed in the media of the hip-hop generation. Part 2 examines the journeys of a composer and a group of students to highlight the process of becoming an artist and the role education plays in its development. The book concludes with a focus on the development of aesthetic appreciation and artistic activity in childhood and adolescence, including, for example, how a child's developing theory of mind affects appreciation for the arts, and how developing empathy and emotional regulation contribute to the cognitive and affective underpinnings of acting in adolescence. As a whole contributors explore the developmental, sociocultural, and evolutionary processes that make the creation and experience of art possible. Intended for researchers and advanced students in both human development and the arts, this book will also serve as a textbook for advanced courses on psychology and the arts and/or special topics courses in cognitive and/or human development.

song on my own: *The Generation of Meaning in Liturgical Songs* Willem Marie Speelman, 1995 This book is about the meaning of liturgical songs. Everybody who sings liturgical songs knows what a liturgical song is and also what it means. But when we start to talk about them, things become confused. We know too much and there are too many languages in which we can express what we think their meaning is. And what is worse, other people seem not to understand what we say and immediately reply that we may know a lot but not what they know. Then the discussion turns into a quarrel amongst people who know too much and cannot communicate what they know. A wise person may enter into the quarrel and say that communication about liturgical songs can only succeed when we sing together. Then we will sing together, confused and angry, because we now also know that the other people may sing very well but do not understand what they are doing. This is what has been happening for decades in the Dutch churches. Perhaps we should be silent and start to look and listen very carefully to liturgical songs, while developing a language in which the songs themselves can speak, communicating what they have to say. The looking and listening will take much time and energy: there are no more easy answers. And the language will be so difficult

that we are forced to be silent, waiting and hoping for a word to come. Willem Marie Speelman (1960) is a musicologist, theologian and semiotician. In the present work he develops a very strict scientific method which can help to understand how liturgical songs work, that is, in what manner they generate meaning.

In the 25 years covered by this book, 160 songs were nominated for Academy Awards. Some are well known, but many are nearly forgotten. They deserve more lasting recognition. Best Songs of the Movies tells the stories behind all these songs, year by year. After announcing the nominated songs, the text describes the way each song was presented and performed, critiques the lyrics and melody, and provides appropriate historical and biographical insights. One appendix presents brief biographies of all the lyricists and composers responsible for these songs; another lists the Oscar-nominated and winning songs from 1959 through 2003. A bibliography and index complete the volume.

song on my own: Hip-Hop Authenticity and the London Scene Laura Speers, 2017-02-17 This book explores the highly-valued, and often highly-charged, ideal of authenticity in hip-hop — what it is, why it is important, and how it affects the day-to-day life of rap artists. By analyzing the practices, identities, and struggles that shape the lives of rappers in the London scene, the study exposes the strategies and tactics that hip-hop practitioners engage in to negotiate authenticity on an everyday basis. In-depth interviews and fieldwork provide insight into the nature of authenticity in global hip-hop, and the dynamics of cultural appropriation, globalization, marketization, and digitization through a combined set of ethnographic, theoretical, and cultural analysis. Despite growing attention to authenticity in popular music, this book is the first to offer a comprehensive theoretical model explaining the reflexive approaches hip-hop artists adopt to 'live out' authenticity in everyday life. This model will act as a blueprint for new studies in global hip-hop and be generative in other authenticity research, and for other music genres such as punk, rock and roll, country, and blues that share similar issues surrounding contested artist authenticity.
