the automobile association route planner: The Routledge Handbook of Cartographic Humanities Tania Rossetto, Laura Lo Presti, 2024-06-03 The Routledge Handbook of Cartographic Humanities offers a vibrant exploration of the intersection and convergence between map studies and the humanities through the multifaceted traditions and inclinations from different disciplinary, geographical and cultural contexts. With 42 chapters from leading scholars, this book provides an intellectual infrastructure to navigate core theories, critical concepts, phenomenologies and ecologies of mapping, while also providing insights into exciting new directions for future scholarship. It is organised into seven parts: Part 1 moves from the depths of the humans-maps

relation to the posthuman dimension, from antiquity to the future of humanity, presenting a multidisciplinary perspective that bridges chronological distances, introspective instances and social engagements. Part 2 draws on ancient, archaeological, historical and literary sources, to consider the materialities and textures embedded in such texts. Fictional and non-fictional cartographies are explored, including layers of time, mobile historical phenomena, unmappable terrain features, and even animal perspectives. Part 3 examines maps and mappings from a medial perspective, offering theoretical insight into cartographic mediality as well as studies of its intermedial relations with other media. Part 4 explores how a cultural cartographic perspective can be productive in researching the digital as a human experience, considering the development of a cultural attentiveness to a wide range of map-related phenomena that interweave human subjectivities and nonhuman entities in a digital ecology. Part 5 addresses a range of issues and urgencies that have been, and still are, at the centre of critical cartographic thinking, from politics, inequalities and discrimination. Part 6 considers the growing amount of literature and creative experimentation that involve mapping in practices of eliciting individual life histories, collective identities and self-accounts. Part 7 examines the variety of ways in which we can think of maps in the public realm. This innovative and expansive Handbook will appeal to those in the fields of geography, art, philosophy, media and visual studies, anthropology, history, digital humanities and cultural studies as well as industry professionals.

the automobile association route planner: To Inherit the Earth Angus Lindsay Wright, Wendy WOLFORD, 2003 In the country with the widest income gap between rich and poor and where millions of children fend for themselves on city streets, one of the world's most successful grassroots social movements has arisen. To Inherit the Earth tells the dramatic story of Brazil's Landless Workers' Movement, or MST-millions of desperately poor, landless, jobless men and women who, through their own nonviolent efforts, have secured rights to over 20 million acres of farmland. Not only are the MST fighting for their own rights, they are transforming their society into a more just one-and their approach may offer the best solution yet to Brazil's environmental problems in the Amazon and elsewhere. Authors Wright and WOLFORD put the movement in its historical, political, and environmental context, trace its growth, and address the issues the MST faces going forward. And throughout, they share dozens of personal stories of people in the movement--stories filled with tremendous courage, personal sacrifice, faith, humor, drama, and determination.
