Alexander, Chris Bishop, David Budgen, Lewis Call, Lillian Céspedes González, Dominic Davies, Sean Eedy, Adam Fotos, Michael Goodrum, Simon Gough, David Hitchcock, Robert Hutton, Iain A. MacInnes, Małgorzata Olsza, Philip Smith, Edward Still, and Jing Zhang In Drawing the Past, Volume 2: Comics and the Historical Imagination in the World, contributors seek to examine the many ways in which history worldwide has been explored and (re)represented through comics and how history is a complex construction of imagination, reality, and manipulation. Through a close analysis of such works as V for Vendetta, Maus, and Persepolis, this volume contends that comics are a form of mediation between sources (both primary and secondary) and the reader. Historical comics are not drawn from memory but offer a nonliteral interpretation of an object (re)constructed in the creator's mind. Indeed, when it comes to history, stretching the limits of the imagination only serves to aid in our understanding of the past and, through that understanding, shape ourselves and our futures. This volume, the second in a two-volume series, is divided into three sections: History and Form, Historical Trauma, and Mythic Histories. The first section considers the relationship between history and the comic book form. The second section engages academic scholarship on comics that has recurring interest in the representation of war and trauma. The final section looks at mythic histories that consciously play with events that did not occur but nonetheless inflect our understanding of history. Contributors to the volume also explore questions of diversity and relationality, addressing differences between nations and the cultural, historical, and economic threads that bind them together, however loosely, and however much those bonds might chafe. Together, both volumes bring together a range of different approaches to diverse material and feature remarkable scholars from all over the world.

vinland saga volume 1: *Odin's Ways* Annette Lassen, 2021-12-24 This book is about the Old Norse god Odin. It includes references to all occurrences of Odin in the Old Norse/Icelandic texts, including Saxo's *Gesta Danorum*, the eddic poems, Snorri's *Edda*, and *Ynglinga saga* and analyses the high medieval reception and literary representations of Odin rather than the religious character of the god. This is the only existing study of Odin in all the Old Norse/Icelandic texts and applies a contextual method: the different guises of Odin are studied on the basis of the various textual contexts and on their background in the literary and Christian intellectual milieu of the time.

Contrary to existing studies, this method is non-reductive in that it does not aim at providing a synthesis about Odin's original nature on the basis of the differing textual uses of Odin in the Middle Ages. The book argues that the perceived complexity of Odin, often highlighted in research, is first and foremost a function of the complex textual material spanning a wide variety of genres each with its particular literary conventions and of the reception of Odin in early modern and modern mythological studies.

The description of Nordic language history is built upon a comprehensive collection of linguistic data; it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries.
