Emma outlines the unique considerations needed for designing and implementing a rich, high-quality curriculum which serves our youngest learners – a blend of academic thinking, educational research, the wisdom of decades of primary experience and a true love of the unique nature of primary. Primary curriculum design is a unique knowledge domain of its own and Emma explains and explores how this knowledge and the thinking around it needs to be championed and implemented through both academic and child development lenses. Rooted in experience, underpinned by successful approaches implemented in hundreds of schools – curriculum
