chinese year of 2013: The Experiment at Philadelphia Kurt B. Bakley, 2016-08-29 The Experiment at Philadelphia Did Einstein discover God? If God created all things, then who Created God? What Was and Happened Before the Big-Bang. The Philadelphia Experiment was Einsteins experiment in which he had not only discovered, in 1943, the way to make things invisible and transport them at great speeds but also positively proven scientifically, physically, and spiritually that the Almighty God exists! He had literally discovered God! That question, is there a god? Thats been going through peoples minds for so long, was discussed on the street corner, talked about on the porch on a hot summers night, and is now a proven fact. Yes, there is a god! Did Einstein in the Philadelphia Experiment make contact with UFO beings, who gave him advance knowledge of all things, which Einstein later destroyed, fearing what the world would do with that knowledge? Are the first fourteen chapters of this book about the advance knowledge Einstein received? Does it reveal the deepest, darkest secrets of God and Satan and how the universe works? Does it answer these questions? Many have asked since the beginning of the world: Which is known as the mystery of God? Why am I here? Whats the true meaning of life? How was everything created? Who are God and the devil? If God created all, who created God? If he is the first in creation, where and how did he come into existence? Why does God allow evil in the world? Why do good things happen to bad people and bad things to good people? Whyif we all came from Adam and Eve, who were Jewishare there Gentiles? Are Gentiles children of devils? Is that why the Jews are Gods chosen race? Why in the Garden of Eden was the knowledge of good on the tree forbidden? How old is the earth? Why is God known as the Trinity? Why have religions, down through the ages, done such evil? What, when, and how did the big bang start? What happened to Satan? Who is he really, and what did he do in the past? What are his beliefs and ways? What is he and God literally made of? What is the meaning of the great pyramids and the sphinx? Is there scientific proof that God exists? Read this whole book for the answers to all these tough questions, and be sure to read the introduction first before reading the rest of this book. It will help you better understand this whole book.

chinese year of 2013: *China's Human Rights Lawyers* Eva Pils, 2014-11-20 This book offers a unique insight into the role of human rights lawyers in Chinese law and politics. In her extensive account, Eva Pils shows how these practitioners are important as legal advocates for victims of injustice and how bureaucratic systems of control operate to subdue and marginalise them. The book also discusses how human rights lawyers and the social forces they work for and with challenge the system. In conditions where organised political opposition is prohibited, rights lawyers have begun to articulate and coordinate demands for legal and political change. Drawing on hundreds of anonymised conversations, the book analyses in detail human rights lawyers' legal advocacy in the face of severe institutional limitations and their experiences of repression at the hands of the police and state security apparatus, along with the intellectual, political and moral resources lawyers draw upon to survive and resist. Key concerns include the interaction between the lawyers and their bureaucratic, professional and social environments and the forms and long term political impact of resistance. In addressing these issues, Pils offers a rare evaluative perspective on China's legal and political system, and proposes new ways to assess domestic advocacy's relationship with international human rights and rule of law promotion. This book will be of great interest and use to students and scholars of law, Chinese studies, socio-legal studies, political studies, international relations, and sociology. It is also of direct value to people working in the fields of human rights advocacy, law, politics, international relations, and journalism.

chinese year of 2013: *Soft Power and the Worldwide Promotion of Chinese Language Learning* Jeffrey Gil, 2017-05-11 'The Confucius Institute Project' - consisting of Confucius Institutes and Classrooms, the posting of Chinese language teachers to overseas schools and universities and the Chinese Bridge language competition - represents an attempt by China to extend its influence globally through the use of soft power. Facilitated by a rapidly increasing demand for Chinese language learning, it has established a presence across the globe and made valuable contributions to the learning and teaching of Chinese. However, this has not necessarily led to an increasingly positive view of China, either at a political or a societal level. Through an analysis of official documents, interviews with those involved, a survey of Chinese-language learners and a study of academic and media sources, the author evaluates the aims of the project, and discusses

whether these aims are being met.

chinese year of 2013: Chinese Research Perspectives on Education, Volume 3 Dongping Yang, 2016-01-12 Chinese Research Perspectives on Educational Development, Volume 3 is an English translation of selected articles from the 2014 Annual Report on Educational Development in China, produced by the 21st Century Education Development Research Academy in China. In this volume, readers are brought up to date on the main educational issues and events of 2013. 2013, the third year since the Outline of China's National Plan for Medium and Long Term Education Reform and Development 2010-2020 was implemented, witnessed the deepening of education reform in terms of improving education quality. This volume starts with a general report by Yang Dongping that explains the new progress as well as barriers of education reform in 2013. Researchers and practitioners in this volume discuss the college graduates' employment situation, trends in preschool education, China's financial investment in education over the past two decades, reform of the national college entrance examination, rural schools, protection of children's rights and interests, investigation into the nationwide suicide epidemic, among other important topics. Chinese Research Perspectives on Educational Development is a co-publication of Brill and Social Sciences Academic Press (China).

chinese year of 2013: Chinese Politics in the Era of Xi Jinping Willy Wo-Lap Lam, 2015-03-12 Renowned for his coverage of China's elite politics and leadership transitions, veteran Sinologist Willy Lam has produced the first book-length study in English of the rise of Xi Jinping--General Secretary of the Chinese Communist Party (CCP) since November 2012. With rare insight, Lam describes Xi's personal history and his fascination with quasi-Maoist values, the factional politics through which he ascended, the configuration of power of the Fifth-Generation leadership, and the country's likely future directions under the charismatic princeling. Despite an undistinguished career as a provincial administrator, Xi has rapidly amassed more power than his predecessors. He has overawed his rivals and shaken up the party-state hierarchy by launching large-scale anti-corruption and rectification campaigns. With a strong power base in the People's Liberation Army and a vision of China as an awakening lion, Xi has been flexing China's military muscle in sovereignty rows with countries including Japan, Vietnam, and the Philippines while trying to undermine the influence of the United States in the Asia-Pacific region. While Xi is still fine-tuning his art of governance, his zero tolerance for dissent and his preoccupation with upholding the privileges of the red aristocracy and the CCP's status as perennial ruling party do not bode well for economic, political, or cultural reforms. Lam takes a close look at Xi's ideological and political profile and considers how his conservative outlook might shape what the new strongman calls the Great Renaissance of the Chinese race.

chinese year of 2013: *Climate Change Governance in Chinese Cities* Qianqing Mai, Maria Francesch-Huidobro, 2014-11-27 In the last thirty years, China has experienced rapid economic development and urbanisation which has resulted in high levels of environmental degradation and has put considerable pressure on the country’s infrastructure and natural resources. As China commits to considerably lower the carbon intensity of its economy, this volume analyses and explains the governance of climate change mitigation responses in major Chinese cities. The book focuses specifically on two highly carbon intensive sectors, buildings and transport, in Guangzhou, Shenzhen, and Hong Kong to explore how collaborative municipal networks function in practice in Chinese cities. The authors find that effective coordination relies on the political will of local administrative elites, the political significance attached to climate change issues, the legitimate authority granted to the coordinating agency, and human and financial capitals. Collaboration is hampered by limited span of network engagement, inadequate authority of the primary network participants, insufficient input and output legitimacy of the sectoral innovations, and missing linkages across functionally segregated sectors. The book concludes that the enhanced collaboration and coordination between networks that has emerged in the process of low carbon transitions is transforming the Chinese environmental state into a more pluralistic, inclusive and legitimate one. This book will be of interest to researchers and practitioners across disciplines including Chinese studies, environmental politics and policy, urban studies, and planning and geography.

chinese year of 2013: Chinese Anti-Ship Ballistic Missile (ASBM) Development Andrew S.

Erickson, 2016-08-02 China's anti-ship ballistic missile (ASBM), the DF-21D, has reached the equivalent of Initial Operational Capability. Although it probably has been deployed in small numbers, additional challenges and tests remain. This study examines the ASBM's capability and history, showing how the DF-21D meets multiple priorities in Chinese defense modernization and in

the national security bureaucracy, as well its implications for the United States. The ASBM's physical threat to U.S. Navy ships will be determined by the development of associated systems and organizations, which currently limit data fusion and coordination in the complex task of identifying a U.S. aircraft carrier in the open ocean. Still, the ASBM poses a direct threat to the foundations of U.S. power project in Asia and will undermine the U.S. position, unless efforts to counter its political-military effects are taken.

chinese year of 2013: Chinese Company and Securities Law Chengwei Liu, 2016-01-21 China enjoys the highest level of foreign investment of any country in the world today. Yet, despite substantial liberalization in last decades, investment in China remains tightly circumscribed. For complex reasons stemming from China's protection of its own internal economy, the government hedges foreign investments, either green field Foreign Direct Investment (FDI) or Mergers and Acquisitions (M&As), with a complex system of laws, regulations and guidelines, bristling with challenges and uncertainties for even the simplest investment or restructurings. This detailed, systematic explanation – by a practicing lawyer with over ten years experience at one of the top law firms in China – provides thorough and up-to-date guidance on the rules and procedures affecting FDI, M&As, and listings in China today. Focusing on such practical matters as key regulations, regulatory requirements, and transactional procedures and structures, the author leads the practitioner through the maze of interconnected national and local authorities, with expert knowledge of when and under what circumstances various rules apply and when they do not as well as practical skills on how to structure a particular deal under current regulations. Included in this superb analysis are detailed descriptions of such factors as the following: • establishment of a new Foreign Invested Enterprise (FIE), including a substantial review of the establishment of both common FIEs (either whole foreign ownership or joint ventures with Chinese parties) and particular FIEs (such as a foreign invested holding company, stock company or partnership); • the cross-border acquisition of a domestic company by foreign investors including the restructuring of existing FIEs by way of domestic re-investment or equity transfer or mergers; • the takeover of a PRC listed company by foreign investors through such ways as a Qualified Foreign Institutional Investor (QFII/RQFII) or strategic investment; • the acquisition of a State-Owned Enterprise (SOE), either listed or non-listed SOE; • the merger control review and national security review involved in an M&A transaction; and • the Initial Public Offering (IPO), follow-on offerings including private placement on Chinese capital market, as well as the issuance of corporate bonds in China. Since the year 2008 when the first edition was published, lots of significant developments were made in regard to the laws and regulations in FDI, M&As and capital market. Such developments and new regulations are given an up-to-date analysis in this second edition. For law firms advising companies on investing in China, or for in-house counsel, this book is without peer as a comprehensive, reliable and easy-to-use resource. At every stage of a project, from the initial business decision to problems arising after successful start-up and during day-to-day operations, it will provide clear, authoritative guidance for years to come.
