Reese, Malini Roy, Sabine Steels, Lucy Stone, Björn Sundmark, Michelle Superle, Nozomi Uematsu, Anastasia Ulanowicz, Helma van Lierop-Debrauwer, and Jean Webb Intergenerational solidarity is a vital element of societal relationships that ensures survival of humanity. It connects generations, fostering transfer of common values, cumulative knowledge, experience, and culture essential to human development. In the face of global aging, changing family structures, family separations, economic insecurity, and political trends pitting young and old against each other, intergenerational solidarity is now, more than ever, a pressing need. *Intergenerational Solidarity in Children's Literature and Film* argues that productions for young audiences can stimulate intellectual and emotional connections between generations by representing intergenerational solidarity. For example, one essayist focuses on Disney films, which have shown a long-time commitment to variously highlighting, and then conservatively healing, fissures between generations. However, Disney-Pixar's *Up* and *Coco* instead portray intergenerational alliances—young collaborating with old, the living working alongside the dead—as necessary to achieving goals. The collection also testifies to the cultural, social, and political significance of children's culture in the development of generational intelligence and empathy towards age-others and positions the field of children's literature studies as a site of intergenerational solidarity, opening possibilities for a new socially consequential inquiry into the culture of childhood.

david walliams grandpa s great escape: Theatre and its Audiences Kate Craddock, Helen Freshwater, 2024-01-25 Written in the aftermath of the Covid crisis, this book brings the past, present and future of theatre-going together as it explores the nature of the relationships between performance practitioners, arts organisations and their audiences. Proposing that the pandemic forced a re-evaluation of what it means to be an audience, and combining historical and current cultural sector perspectives, the book reflects on how historical conventions have conditioned present day expectations of theatre-going in the UK. Helen Freshwater examines the ways in which developments in technology, architecture and forms of communication have influenced what is expected by and of audiences, reflecting changes in theatre's cultural status and place in our lives. Drawing on the first-hand experiences of festival director and performance practitioner Kate Craddock, it also contends that practitioners now need to turn their attention to care, access and sustainability, arguing that the pandemic taught us, above all, that it is possible to do things differently. Part vision, part provocation, part critical interrogation, Theatre and its Audiences offers an insightful appraisal of past norms and assumptions to set out a bold argument about where we should go from here.
