Their short stories and poems sit alongside first-hand accounts of slavery from freed slaves, making a fascinating and absorbing collection that remembers and commemorates one of the most brutal and long-lasting inflictions of misery that human beings have inflicted upon other human beings.

hacker by malorie blackman: Children's Publishing and Black Britain, 1965-2015 Karen Sands-O'Connor, 2017-06-23 This book examines a critical period in British children's publishing, from the earliest days of dedicated publishing firms for Black British audiences to the beginnings of the Black Lives Matter movement in the UK. Taking a historical approach that includes education acts, Black protest, community publishing and children's literature prizes, the study investigates the motivation behind both independent and mainstream publishing firm decisions to produce books for a specifically Black British audience. Beginning with a consideration of early reading schemes that incorporated Black and Asian characters, the book continues with a history of one of the earliest presses to publish for children, Bogle L'Ouverture. Other chapters look at the influence of community-based and independent presses, the era of multiculturalism and anti-racism, the effect of racially-motivated violence on children's publishing, and the dubious benefit of awards for Black British publishing. The volume will appeal to children's literature scholars, librarians, teachers, education-policy makers and Black British historians.
