Who Is Jane Considine?

Educational Background and Career

Jane Considine is an experienced literacy specialist, teacher, and author with a background rooted in primary education. She has spent decades working with children and teachers, developing programs that aim to demystify writing and make it an enjoyable, achievable skill. Her extensive classroom experience informs her understanding of the challenges faced by students and educators alike, leading to her innovative pedagogical strategies.

The Genesis of The Write Stuff

Considine's "The Write Stuff" was born out of her desire to create a structured yet flexible framework that could be adapted to various classroom contexts. Recognizing that many students struggle with writing due to a lack of clear guidance and confidence, she devised a method that emphasizes explicit instruction, visual learning, and a gradual build-up of skills. Her approach aligns with research in cognitive science and literacy development, emphasizing the importance of modeling, scaffolding, and formative assessment.

The Core Principles of The Write Stuff

Explicit Teaching and Modelling

At the heart of Considine's methodology is the principle of explicit teaching. Teachers model writing processes step-by-step, demonstrating how to plan, structure, and craft sentences and paragraphs. This modelling helps students internalize effective strategies and understand the mechanics of good writing.

Visual Aids and Graphic Organizers

The Write Stuff utilizes a range of visual tools such as story maps, sentence builders, and writing frames. These aids serve multiple purposes:

- Clarify the writing structure
- Support memory retention
- Encourage independent writing

By making abstract concepts concrete, visual aids help students grasp complex skills more easily.

Systematic Progression and Scaffolding

Considine advocates for a carefully sequenced progression of skills, starting from basic sentence construction to more complex paragraph and narrative development. The approach employs

scaffolding techniques, gradually reducing teacher support as students gain confidence and competence.

The 'Sentence Stacking' Technique

A distinctive feature of The Write Stuff is the "sentence stacking" approach, which involves:

- Building sentences vertically
- Starting with simple sentences and gradually combining them
- Using sentence stems and starters to guide students

This technique promotes sentence fluency and variety, essential for creating engaging writing.

Focus on Vocabulary and Sentence Structure

Considine emphasizes teaching vocabulary explicitly and exploring sentence structures creatively. This focus helps students develop a rich language repertoire and write with greater sophistication.

Consistent Feedback and Assessment

Regular formative assessment ensures that students receive targeted feedback. This ongoing evaluation helps teachers adjust instruction to meet individual needs and track progress over time.

Pedagogical Foundations and Evidence Base

Cognitive Science and Literacy Development

Considine's approach draws heavily on cognitive load theory and the science of literacy development. By breaking down writing into manageable chunks and providing visual scaffolds, the method reduces cognitive overload, making learning more effective.

Constructivist and Student-Centered Learning

While systematic, The Write Stuff also encourages student agency. Pupils are active participants in their learning, engaging in discussions, editing, and peer review, fostering ownership and motivation.

Alignment with Curriculum Standards

The methodology aligns with national curriculum standards for English and literacy, ensuring that skills taught are relevant and transferable across contexts.

Practical Implementation in the Classroom

Planning and Preparation

He is the deity Mary Myatt and John Tomsett have adopted as their god of the school curriculum. Their first book in the Huh series focused upon how school practitioners design the Key Stage 3 curriculum. Its popularity prompted calls from many quarters for a similar book on the primary curriculum. Supported by their primary colleagues, Rachel Higginson, Lekha Sharma & Emma Turner, Mary and John interviewed over 30 primary practitioners about how they design the primary curriculum. Considering the diverse nature of primary schools in this country, it's not surprising that they were soon confronted with numerous context-dependent curriculum complexities. Designing the curriculum for small primary schools, for instance, means solving the conundrum of teaching the same subject at the same time to three different year groups in one class. The conversations confirmed that shaping a primary school curriculum is a tricky business! The wisdom gleaned from the genuine experts Mary and John interviewed was limitless. The material was so important it meant that they had too much for a single volume. Twenty-one of those thirty-plus conversations comprise the book Primary Huh, which focused upon the curriculum of each individual subject from EYFS to Year 6. In this companion book, Primary Huh 2, Mary and John give a platform to practitioners who lead on the broader issues of primary curriculum design, including, amongst other things: shaping the curriculum for mixed-age classes; designing and implementing a cross-MAT curriculum; building the "cradle to career" curriculum; timetabling; assessment; transition, and diversity. Primary Huh 2 is riven through with authentic voices grappling with the endless challenge of providing our children with a rich, challenging, ambitious, beautiful curriculum.
