life in the uk free test 2024: Mobility Citizenship Chris Moreh, 2025-01-31 This book aims to trace the development of a new conception of 'mobility citizenship' in Europe historically, demographically and experientially. To this aim, it adopts a 'constellationist' approach applied to the intra-European mobility space and uses the case studies of Hungarian and Romanian migration to the United Kingdom to develop a multidimensional meso-level comparative empirical analysis of mobility-citizenship constellations. The main theoretical proposition of the book is that citizenship has undergone a noticeable change in meaning and valuation, with mobility rights becoming a more central component in the structure of opportunities it provides citizens. The logic of 'mobility citizenship' is thus changing long-held perceptions around the social functions of citizenship, and consequently, the nature of contemporary transnational society. The multifaceted analysis presented in the book will appeal to readers with backgrounds in various disciplines such as political sociology, migration studies, citizenship studies, nationalism studies, or European studies.

life in the uk free test 2024: *Life in Britain and Germany on the Road to War* Anton Rippon, Nicola Rippon, 2024-04-04 In December 1922, the distinguished foreign correspondent Leonard Spray warned Britain to 'keep your eye on Hitler'. The carnage of the so-called 'war to end all wars' had left 900,000 British servicemen dead, and more than 2 million suffering physical and psychological wounds, but there was hope. The vanquished had been left with no military capacity to wage another war, and with a huge debt to pay to the victors. The Treaty of Versailles had surely made it impossible for the world to ever again be threatened by Germany? Safe in that knowledge, Britain now had her eye firmly set on new challenges. The cost of the war had already triggered her decline as the world's greatest economic power. The Great Depression that followed the Wall Street Crash of 1929 now saw Britain riven by unemployment and poverty. Seven General Elections between 1918 and 1935 resulted in mostly minority and coalition governments, bringing further

uncertainty.
