A devoted pastor and family man, the Reverend W Awdry first started telling the stories in order to amuse his own children, with no idea that the characters would lead to a global phenomenon that now, seventy years after their first appearance, shows no signs of waning. In this fascinating and warm biography, prolific author Brian Sibley brings to life one of the most eminent children's writers of the twentieth century, tracing his story from his Edwardian childhood through his time at University and into World War 2. A convinced pacifist, Awdry was thrown out of one curacy and denied another, because of his beliefs. Never afraid to fight for what he thought was right, he argued with his publishers and his illustrators, demanding the best for his favourite creations - the trains and their friends.

Young, 2024-08-15 An illustrated account of the little-known operations of the Imperial Japanese Naval Air Force's flying boat units during World War 2. Respectively codenamed the 'Mavis' and 'Emily' by the Allies, Japan's H6K and H8K flying boats outstripped their RAF and US Navy counterparts. The 1941 outbreak of war in the Pacific and Southeast Asia saw these remarkable aircraft carry out offensive missions across vast tracts of ocean and employ their unique capabilities to escort convoys and serve as transports between Japan's island bases. However, while the technical details of the H6K and H8K are well known in the West, this important new study marks the first English-language account of their wartime operations. Utilizing newly translated Japanese war diaries, as well as Allied intelligence and combat reports, celebrated Pacific War expert Edward M. Young reveals the full story behind the Imperial Japanese Naval Air Force's flying boat units. Contemporary photos and 22 colour profiles bring new dimensions to this fascinating area of Japanese military history, vividly illustrating the pivotal roles of 'Emily' and 'Mavis' in events including the Battle of the Coral Sea, the Battle of Midway and the fighting in the Aleutians and the Bismarck and Solomon Islands.

mavis the tank engine: H6K "Mavis"/H8K "Emily" vs PB4Y-1/2 Liberator/Privateer Edward M. Young, 2023-02-16 An illustrated exploration of the dramatic aerial combats between the US Navy's long-range bomber and Japanese flying boats in the Pacific War. Edward Young explores these rarely written about combats, examining the aggressive and strategic tactics deployed by both US Navy and Imperial Japanese Navy Air Force and analyzing the technical improvements installed throughout the war. The PB4Y-1/2 Liberator/Privateer was the US Navy's first four-engined, land-based bomber, adapted and allocated to fight the U-boat menace in the Atlantic and protect the vast reaches of the Pacific Ocean. The long range, speed, armament and bomb load of the PB4Y-1 enabled the US Navy's Pacific squadrons to adopt more aggressive tactics. The PB4Y-1, and its follow-on PB4Y-2, engaged in dangerous bombing missions against Japanese installations, shipping strikes, and air combat. On the other side, with its doctrine of making the first strike against an enemy fleet, the Imperial Japanese Navy recognized the vital importance of maritime reconnaissance, relying on carrier-based reconnaissance aircraft, ship-borne floatplanes and, for long-range maritime patrol, flying boats. The Japanese would continue to develop their aircraft

throughout the war, resulting, among others, in the H6K 'Mavis' and the H8K2 'Emily', which despite never achieving a victory, was regarded by the Allied pilots as the most difficult Japanese aircraft to destroy. Enriched with specially commissioned artwork, including armament and cockpit views, battlescenes and technical diagrams, this title analyses technical specifications in detail. By including first-hand accounts, aviation expert Edward Young provides a detailed account of these one-sided yet dramatic and aggressive combats.

It is part professional reference, part career guide, part instructive reference for students wishing to enter the field, and wholly autobiographical. Dr. Lucas chronicles a number of the high-profile cases he's worked on firsthand. This includes both the logistical problem-solving of case management—how to process and handle the evidence—in addition to the testing, analysis and processes he went through, and developed, along the way. Such cases include mass disaster plane crashes, arson, IEDs and explosives, poisonings, missing persons, and homicides, to name just a few. Dr. Lucas has encountered and seen just about everything a forensic professional can see. In addition to the in-depth discussion, development, and philosophy of forensic science as a discipline, the book also discusses the balance of personal and professional life. This is a vital, but little thought of aspect that becomes a conspicuous reality of working in the field: namely, delving into the science, and dealing with those personal emotions, work conflicts, and ethical conundrums that a professional regularly encounters. Forensic professionals, investigators, and students—regardless of background or discipline—will find this a fascinating look behind the curtain at one of the most decorated, innovative, and respected members of the field over the last 50 years.

2020-09-15 In this follow-up to *Guidance for Every Child*, author Dan Gartrell, EdD, expands on the advice broached in that book—that children need guidance rather than discipline. Guidance is teaching for healthy emotional and social development. On a day-to-day basis as conflicts occur, guidance is teaching children to learn from their mistakes, rather than punishing them for the mistakes they make; helping children learn to solve their problems, rather than punishing children for having problems they cannot solve. In *A Guidance Guide for Early Childhood Leaders*, Dan explores secure relationships as the foundation for guidance and how to build them with children, families, and colleagues. He gives examples of how children's mistaken behavior (not misbehavior) can play out in the classroom and provides strategies on how early childhood professionals can help others to gain the emotional health they need to be socially responsive, and then support the social skills they need to build relationships and solve problems cooperatively.
