Built on a chassis that emphasized driving dynamics and safety, the Alfetta was a significant step forward for Alfa Romeo, incorporating advanced engineering features for its time. The model was available in various body styles, including sedan, saloon, and coupé. The Alfetta Coupe, in particular, was designed to appeal to customers seeking a sporty, stylish, and dynamic vehicle.

Design Philosophy and Objectives

The primary goal behind the Alfetta Coupe was to combine sporty performance with elegant styling, targeting a market segment that valued both form and function. Alfa Romeo aimed to produce a car that was not only a pleasure to drive but also visually striking, embodying the brand's sporting heritage. The design team focused on creating a sleek, aerodynamic silhouette, complemented by carefully crafted details that emphasized motion even when stationary.

- Two-door configuration with a fastback roofline that accentuates the sporty character.
- Bold wheel arches accommodating wide tires for enhanced grip and stability.
- Chromed accents and elegant details that give the car a refined appearance.

Overall, the coupe's design balances aerodynamic efficiency with aesthetic appeal, resulting in a timeless look that remains attractive decades later.

- Transaxle layout — engine and gearbox positioned at the front, with the differential at the rear — for optimal weight distribution.
- Independent suspension on all four wheels, with wishbones at the front and a rear semi-trailing arm setup.
- Low center of gravity, contributing to excellent handling and cornering capabilities.

This engineering approach provided a balanced, agile driving experience that was ahead of its time.

The Alfa Romeo Alfetta Coupe was powered by several engine options over its production run, primarily:

1. **1.8-liter Inline-Four** — producing around 122 horsepower, offering a lively and responsive drive.
2. **2.0-liter Inline-Four** — with outputs ranging from 122 to 130 horsepower, depending on the market and version.
3. **2.6-liter V6** — introduced later, delivering approximately 160 horsepower, significantly boosting performance.

The engines were renowned for their smoothness, high-revving nature, and distinctive exhaust note, contributing to the car's sporty character.

Transmission and Driving Dynamics

Most Alfetta Coupes came with a five-speed manual transmission, emphasizing driver control and engagement. Some models offered optional automatic transmissions, though they were less common. The coupe's chassis and engine layout ensured:

- Excellent weight distribution, often close to 50/50 front-rear.
- Precise steering with a quick ratio, enhancing responsiveness.
- Good ride comfort without sacrificing sportiness.
- Impressive handling, allowing drivers to confidently tackle winding roads and curves.

Overall, the Alfetta Coupe was celebrated for its dynamic driving experience that combined agility with stability.
