The 8-Week Blood Sugar Diet is a radical new approach to the biggest health epidemic threatening us today... Our modern diet, high in low-quality carbohydrates, is damaging our bodies—producing a constant overload of sugar in our bloodstream that clogs up our arteries and piles hidden fat into our internal organs. It is now known that even moderately elevated blood sugar levels can trigger heart disease, stroke, dementia, and cancer. But scientists have recently demonstrated that you can prevent and even reverse type 2 diabetes with a simple change in diet and lifestyle. Drawing on the work of Dr. Roy Taylor—one of the UK's foremost diabetes experts—and his own experience as a one-time diabetic, Dr. Michael Mosley presents a groundbreaking, science-based, 8-week plan for diabetics who want to reverse their condition (and then stay off medication). He also offers a more flexible regime for people interested in the extensive health benefits to be gained from lowering their blood sugar levels and shedding dangerous fat. As Dr. Mosley says, it is never too late to act.

michael mosley recipe book: The Ageless Body Peta Bee, Sarah Schenker, 2015-12-31 Discover the new goals and new rules that are the route to a healthier, better looking and better functioning body... for life! From Gwen Stefani and Cameron Diaz to Jennifer Aniston and Naomi Watts, a new breed of 40 and 50 plus women are redefining not just what an ageless body looks like, but what's entailed in achieving it. A dramatic shift in body expectations in the last few years means that, despite being plagued by a slowing metabolism and a naturally-occurring loss of muscle mass, pre- and post-menopausal women can realistically aim for the healthy, well-functioning body they crave as well as a physique that looks good with a flat stomach and sculpted arms. Peta Bee and Dr Sarah Schenker are the living embodiment of this new breed of woman: both in their forties with children, both with hectic careers and social lives. And both with the same bodies they had in their 30s. What matters, they have discovered through self-experimentation and trawling the scientific literature, is how you go about holding back the years. And the rules - for both exercise and diet - have changed.
