our man in havana novel: *Our Man Down in Havana* Christopher Hull, 2019-03-05 When U.S. immigration authorities deported Graham Greene from Puerto Rico in 1954, the British author made an unplanned visit to Havana and the former MI6 officer had stumbled upon the ideal setting for a comic espionage story. Three years later, he returned in the midst of Castro's guerrilla insurgency against a U.S.-backed dictator to begin writing his iconic novel *Our Man in Havana*. Twelve weeks after its publication, in January 1959, the Cuban Revolution triumphed, soon transforming a capitalist playground into a communist stronghold. Combining biography, history, politics, and a measure of psychoanalysis, *Our Man Down in Havana* investigates the real story behind Greene's fiction. It includes his many visits to a pleasure island that became a revolutionary island, turning his chance involvement into a political commitment. His Cuban novel describes an amateur agent who dupes his intelligence chiefs with invented reports about "concrete platforms and unidentifiable pieces of giant machinery." With eerie prescience, Greene's satirical tale had foretold the Cold War's most perilous episode, the 1962 Cuban Missile Crisis.

our man in havana novel: Psychoanalytic Patterns in the Work of Graham Greene Roland A. Pierloot, 2023-12-14 In Greene's writings we notice a genuine concern with social and political conflicts at different places in the world. But at the same time they bear witness to a distinct involvement in problems of human nature and behaviour. In this respect we can formulate some dominating preoccupations, such as the stressing of antitheses and antagonisms, which he calls himself 'cleavage'; the questioning of loyalty and the claiming of the right to disloyalty; the repercussion of childhood experiences, in particular the father-son relationship, on adult life; and the transcendental dimension in human experience. From a psychoanalytic viewpoint we analyse the various elaborations of these general themes in the work of Greene as symbolizations of specific unconscious phantasies, defined in the writings of Freud, Klein, Fairbairn, Kernberg, Kohut and Winnicott. This analysis of the imaginary world of an author is conceived as analogous to a clinical psychoanalysis. It is a hermeneutical activity based on the countertransference experience, evoked by the reading of the text, while taking into account the manifold strategies of symbolizing in a literary work, the choice of the genre, themes, text-construction, tropes, word-plays, figurative language, repetition, discontinuity, parallelism, plot and characters.
