The History of the Louvre: From Fortress to Museum

Origins as a Fortress

The Louvre's story begins in the late 12th century when King Philip II ordered the construction of a fortress to defend Paris from invaders. Originally built as a defensive stronghold, the fortress was strategically positioned along the Seine River, offering protection and control over the city. Over the centuries, it evolved from a military installation to a royal residence, reflecting the shifting political landscape of France.

Transformation into a Royal Palace

By the 16th century, the Louvre had become a symbol of royal power and prestige. French monarchs, including Francis I and Henry IV, expanded and renovated the structure, transforming it into a grand palace. This period saw the addition of ornate Renaissance architecture, which laid the foundation for its later development as a cultural hub.

The Birth of the Museum

The transition from royal residence to public museum occurred during the French Revolution. In 1793, the Louvre was officially opened as a museum, showcasing the nation's art collection to the public. The revolutionary ideals of liberty and education fueled this move, making art accessible to all citizens. Since then, the Louvre has continuously expanded its collection and modernized its facilities, becoming a global symbol of cultural heritage.

Rohan's interest might lead him to the Greek sculpture Winged Victory of Samothrace, also known as Nike of Samothrace. Positioned at the top of a flight of stairs, this Hellenistic masterpiece embodies movement and grace, celebrating victory and divine power.

The Coronation of Napoleon: A Grand Canvas

In the Denon Wing, Rohan could discover Jacques-Louis David's The Coronation of Napoleon. This enormous painting captures the grandeur of Napoleon's crowning ceremony, offering insights into the political and cultural context of early 19th-century France.

rohan in the louvre: Classical Reception Anastasia Bakogianni, Luis Unceta Gómez, 2024-07-22 In a time of acute crisis when our societies face a complex series of challenges (race, gender, inclusivity, changing pedagogical needs and a global pandemic) we urgently need to re-access the nature of our engagement with the Classical World. This edited collection argues that we need to discover new ways to draw on our discipline and the material it studies to engage in meaningful ways with these new academic and societal challenges. The chapters included in the collection interrogate the very processes of reception and continue the work of destabilising the concept of a pure source text or point of origin. Our aim is to break through the boundaries that still divide our ancient texts and material culture from their reception, and interpretive communities.

Our contributors engage with these questions theoretically and/or through the close examination of cultural artefacts. They problematise the concept of a Western, elitist canon and actively push the geographical boundaries of reception as both a local and a global phenomenon. Individually and cumulatively, they actively engage with the question of how to marshal the classical past in our efforts to respond to the challenges of our mutable contemporary world.

Focusing on the production and reception of these texts, the book explains the relevance of publishing to the cultural, commercial and social contexts of collections and their institutions. Combining theory with case studies from around the world, Sarah Anne Hughes explores how, why and to what effect museums and galleries publish books. Covering a broad range of publishing formats and organisations, including heritage sites, libraries and temporary exhibitions, the book argues that the production and consumption of printed media within the context of collecting institutions occupies a unique and privileged role in the creation and communication of knowledge. Acknowledging that books offer functions beyond communication, Hughes argues that this places books published by museums in a unique relationship to institutions, with staff acting as producers and visitors as consumers. The logistical and ethical dimensions of museum and gallery publishing are also examined in depth, including consideration of issues such as production, the impact of digital technologies, funding and sponsorship, marketing, co-publishing, rights, and curators' and artists' agency. Focusing on an important but hitherto neglected topic, *Museum and Gallery Publishing* is key reading for researchers in the fields of museum, heritage, art and publishing studies. It will also be of interest to curators and other practitioners working in museums, heritage and science centres and art galleries.
