Each chapter addresses a different form of animal harm and objectification through the theories of speciesism, romanticism, and the ‘collapse of compassion’ effect, from farming, hunting and fishing, to clothing, work, and entertainment. Stanton lucidly presents the dichotomy between depictions of higher order, anthropomorphised and neotonised animal characters and that of lower-order species, showing furthermore how these depictions are closely linked to changing social attitudes about acceptable forms of animal harm. An engaging and novel contribution to the field of Critical Animal Studies, this book explores the use of animals not only in Disney’s best known animated films such as 101 Dalmatians, but also lesser known features including Home on the Range and Fun and Fancy Free. A quantitative appendix supplying data on how often each animal species appears and the amount of times animal harm or objectification is depicted in over fifty films provides an invaluable resource and addition to scholars working in both Disney and animal studies.

Slethaug, 2014-06-19 Traditional critics of film adaptation generally assumed a) that the written text is better than the film adaptation because the plot is more intricate and the language richer when pictorial images do not intrude; b) that films are better when particularly faithful to the original; c) that authors do not make good script writers and should not sully their imagination by writing film scripts; d) and often that American films lack the complexity of authored texts because they are sourced out of Hollywood. The 'faithfulness' view has by and large disappeared, and intertextuality is now a generally received notion, but the field still lacks studies with a postmodern methodology and lens. Exploring Hollywood feature films as well as small studio productions, *Adaptation Theory and Criticism* explores the intertextuality of a dozen films through a series of case studies introduced through discussions of postmodern methodology and practice. Providing the reader with informative background on theories of film adaptation as well as carefully articulated postmodern methodology and issues, Gordon Slethaug includes several case studies of major Hollywood productions and small studio films, some of which have been discussed before (*Age of Innocence*, *Gangs of New York*, and *Do the Right Thing*) and some that have received lesser consideration (*Six Degrees of Separation*, *Smoke*, *Smoke Signals*, *Broken Flowers*, and various *Snow White* narratives including *Enchanted*, *Mirror Mirror*, and *Snow White and the Huntsman*). Useful for both film and literary studies students, *Adaptation Theory and Criticism* cogently combines the existing scholarship and uses previous theories to engage readers to think about the current state of American literature and film.

snow white and the animals: Fairy Tales and the Art of Subversion Jack Zipes, 2012-02-07 The fairy tale is arguably one of the most important cultural and social influences on children's lives. But until the first publication of *Fairy Tales and the Art of Subversion*, little attention had been paid to the ways in which the writers and collectors of tales used traditional forms and genres in order to shape children's lives - their behavior, values, and relationship to society. As Jack Zipes convincingly shows in this classic work, fairy tales have always been a powerful discourse, capable of being used to shape or destabilize attitudes and behavior within culture. How and why did certain authors try to influence children or social images of children? How were fairy tales shaped by the changes in European society in the sixteenth and seventeenth centuries? Zipes examines famous writers of fairy tales such as Charles Perrault, Jacob and Wilhelm Grimm, Hans Christian Andersen and L. Frank Baum and considers the extraordinary impact of Walt Disney on the genre as a fairy tale filmmaker.
