stop making sense manchester: Stop Making Sense Scott Wilson, 2018-04-17 This book offers a new theory of music as a form of social bond analogous to language as it is understood according to the Lacanian orientation in psychoanalysis. It presents contemporary examples that look at how music has become both a powerful locus of discontent and a form of orientation.

stop making sense manchester: Shadowplayers James Nice, 2025-10-07 'Definitive and comprehensive, this is the actual story of Factory Records' Peter Saville In 1978, a 'Factory for Sale' sign gave Alan Erasmus and Tony Wilson a name for their fledgling Manchester club night. Though they couldn't have known it at the time, this was the launch of one of the most significant musical and cultural legacies of the late twentieth century. The club's electrifying live scene soon translated to vinyl, and Factory Records went on to become the most innovative and celebrated record label of the next thirty years. Always breaking new musical ground, Factory introduced the listening public to bands such as Joy Division, whose Unknown Pleasures was the label's first album release, New Order, Durutti Column and Happy Mondays. Propelled onwards by the inspirational cultural entrepreneur, Tony Wilson, Factory always sought new ways to energise the popular consciousness,

such as the infamous Hacienda nightclub, which enjoyed a chequered 15-year history after opening in 1982. Now fully revised and expanded with a new chapter, *Shadowplayers* is the most complete, authoritative and thoroughly researched account of how a group of provincial anarchists and entrepreneurs saw off bankers, journalists and gun-toting gangsters to create the most influential record label of modern times. Based on both archive and contemporary sources, the book tells the full story of Factory's heroic struggles, its complex web of inventive, idiosyncratic and tragic personalities, and ultimately, the acclaimed and much-loved music it produced.

stop making sense manchester: Making Sense of the Great War Alex Mayhew, 2024-04-18

The First World War was an unprecedented crisis, with communities and societies enduring the unimaginable hardships of a prolonged conflict on an industrial scale. In Belgium and France, the terrible capacity of modern weaponry destroyed the natural world and exposed previously held truths about military morale and tactics as falsehoods. Hundreds of thousands of soldiers suffered some of the worst conditions that combatants have ever faced. How did they survive? What did it mean to them? How did they perceive these events? Whilst the trenches of the Western Front have come to symbolise the futility and hopelessness of the Great War, Alex Mayhew shows that English infantrymen rarely interpreted their experiences in this way. They sought to survive, navigated the crises that confronted them, and crafted meaningful narratives about their service. *Making Sense of the Great War* reveals the mechanisms that allowed them to do so.

stop making sense manchester: The Pop Documentary Since 1980 Richard Wallace,

2025-07-10 In *The Pop Documentary Since 1980*, Richard Wallace examines the representation of pop music, musicians and music-making in documentary film and television. He draws together conceptual frameworks from within and outside of film and television studies - including performance studies, musicology, celebrity studies and fan studies - to provide a critical interrogation of the central issues in this genre. A common criticism of the music documentary is that it lacks artistic integrity because of its close affiliation with its subject. Wallace argues that music documentaries can be artful and conceptually complex and be part of a broader process of image curation under the control of the artist and their management. This contradiction is key to the form's vitality and Wallace explores two competing lines of enquiry. First, the contribution that such documentaries make to the public perception of their subjects. Second, he argues that its 'official' status does not preclude music documentaries from being artistic or engaging with the theoretical questions that underpin documentary media more broadly. Other issues addressed include: - how documentaries about song writing attempt to represent intangible concepts like 'creativity' and 'inspiration'; - how the experiential and affective aspects of music are communicated through the visual image; - ethical considerations. Each of these conceptual questions is examined through detailed analysis of a variety of music documentaries ranging from *Stop Making Sense* to *Tokyo Idols* via *Beyoncé* and *The Beatles*.

considers a broad range of music documentaries, delving into their cinematic style, political undertones, racial dynamics, and gender representations, in order to assess their role in the cultivation of myth. Combining historical and critical analyses, and drawing on film and music criticism, Fox examines renowned music films such as *A Hard Day's Night* (1964), *Dig!* (2004), and *Amazing Grace* (2006), critically lauded works like *Milford Graves Full Mantis* (2018) and *Mistaken for Strangers* (2013), and lesser-studied films including *Jazz on a Summer's Day* (1959) and *Ornette: Made in America* (1985). In doing so, he offers a comprehensive overview of the genre, situating these films within their wider cultural contexts and highlighting their formal and thematic innovations. Discussions in the book span topics from concert filmmaking to music production, the music industry, touring, and filmic representations of authenticity and truth. Overall, *Music Films* traces the evolution of the genre, highlighting its cultural significance and connection to broader societal phenomena.

chapters collected in this volume shed light on the areas of interaction between film studies and

heavy metal research, exploring how the audio-visual medium of film relates to, builds on and shapes metal culture. At one end of the spectrum, metal music serves as a form of ambient background in horror films that creates an intense and somewhat threatening atmosphere; at the other end, the high level of performativity attached to the metal spectacle is emphasized. Alongside these tendencies, the recent and ongoing wave of metal documentaries has taken off, relying on either satire or hagiography.

stop making sense manchester: American Literature in the Era of Trumpism Dolores Resano, 2022-08-23 This edited collection offers an exploration of American literature in the age of Trumpism—understood as an ongoing sociopolitical and affective reality—by bringing together analyses of some of the ways in which American writers have responded to the derealization of political culture in the United States and the experience of a ‘new’ American reality after 2016. The volume’s premise is that the disruptions and dislocations that were so exacerbated by the political ascendancy of Trump and his spectacle-laden presidency have unsettled core assumptions about American reality and the possibilities of representation. The blurring of the relationship between fact and fiction, bolstered by the discourses of ‘fake news’ and ‘alternative facts,’ has not only drawn attention to the shattering of any notion of ‘shared’ reality, but has also forced a reexamination of the purpose and value of literature, especially when considering its troubled relation to the representation of ‘America.’ The authors in this collection respond to the invitation to reassess the workings of fiction and critique in an age of Trumpism by considering some of the most recent literary responses to the (new) American realit(ies)—including works by Colson Whitehead, Ben Winters, Claudia Rankine, Gary Shteyngart, Jennifer Egan, and Steve Erickson, to name but a few—, some of which were composed in the run-up to the 2016 election but were able to accurately and incisively imagine the world to come.

stop making sense manchester: Music/Video Gina Arnold, Daniel Cookney, Kirsty Fairclough, Michael Goddard, 2017-08-30 This book is a lively, comprehensive and timely reader on the music video, capitalising on cross-disciplinary research expertise, which represents a substantial academic engagement with the music video, a mediated form and practice that still remains relatively under-explored in a 21st century context. The music video has remained suspended between two distinct poles. On the one hand, the music video as the visual sheen of late capitalism, at the intersection of celebrity studies and postmodernism. On the other hand, the music video as art, looking to a prehistory of avant-garde film-making while perpetually pushing forward the digital frontier with a taste for anarchy, controversy, and the integration of special effects into a form designed to be disseminated across digital platforms. In this way, the music video virally re-engenders debates about high art and low culture. This collection presents a comprehensive account of the music video from a contemporary 21st century perspective. This entails revisiting key moments in the canonical history of the music video, exploring its articulations of sexuality and gender, examining its functioning as a form of artistic expression between music, film and video art, and following the music video's dissemination into the digital domain, considering how digital media and social media have come to re-invent the forms and functions of the music video, well beyond the limits of “music television”.

stop making sense manchester: *Becoming Noise Music* Stephen Graham, 2023-01-12 *Becoming Noise Music* tells the story of noise music in its first 50 years, using a focus on the music's sound and aesthetics to do so. Part One focuses on the emergence and stabilization of noise music across the 1980s and 1990s, whilst Part Two explores noise in the twenty-first century. Each chapter contextualizes - tells the story - of the music under discussion before describing and interpreting its sound and aesthetic. Stephen Graham uses the idea of 'becoming' to capture the unresolved 'dialectical' tension between 'noise' disorder and 'musical' order in the music itself; the experiences listeners often have in response; and the overarching 'story' or 'becoming' of the genre that has

taken place in this first fifty or so years. The book therefore doubles up on becoming: it is about both the becoming it identifies in, and the larger, genre-making process of the becoming of, noise music. On the latter count, it is the first scholarly book to focus in such depth and breadth on the sound and story of noise music, as opposed to contextual questions of politics, history or sociology. Relevant to both musicology and noise audiences, *Becoming Noise Music* investigates a vital but analytically underexplored area of avant-garde musical practice.

Although in more recent years subculture has been the subject of sustained critique, it still provides a valuable point of reference for study and research. This text offers students an up-to-date and wide-ranging account of new developments in youth culture research that reject, refine or reinvent the concept of subculture. Bringing together key theoretical statements with illuminating analyses of particular aspects of youth culture - popular music, clubbing, body modification, the internet, etc. - this is an ideal introduction to a diverse and wide-ranging field.

stop making sense manchester: The Arena Concert Robert Edgar, Kirsty Fairclough-Isaacs, Benjamin Halligan, Nicola Spelman, 2015-01-01 The Arena Concert: Music, Media and Mass Entertainment is the first sustained engagement with what might said to be - in its melding of concert and gathering, in its evolving relationship with digital and social media, in its delivery of event, experience, technology and star - the art form of the 21st century. This volume offers interviews with key designers, discussions of the practicalities of mounting arena concerts, mixing and performing live to a mass audience, recollections of the giants of late twentieth century music in performance, and critiques of latter-day pretenders to the throne. The authors track the evolution of the arena concert, consider design and architecture, celebrity and fashion, and turn to feminism, ethnographic research, and ideas of humour, liveness and authenticity, in order to explore and frame the arena concert. The arena concert becomes the "real time" centre of a global digital network, and the gig-goer pays not only for an immersion in (and, indeed, role in) its spectacular nature, but also for a close encounter with the performers, in this contained and exalted space. The spectacular nature of the arena concert raises challenges that have yet to be fully technologically overcome, and has given rise to a reinvention of what live music actually means. Love it or loathe it, the arena concert is a major presence in the cultural landscape of the 21st century. This volume finds out why.

stop making sense manchester: The Bloomsbury Handbook to Literature and Psychoanalysis Jeremy Tambling, 2023-03-09 Providing the most comprehensive examination of the two-way traffic between literature and psychoanalysis to date, this handbook looks at how each defines the other as well as addressing the key thinkers in psychoanalytic theory (Freud, Klein, Lacan, and the schools of thought each of these has generated). It examines the debts that these psychoanalytic traditions have to literature, and offers plentiful case-studies of literature's influence from psychoanalysis.

Engaging with critical issues such as madness, memory, and colonialism, with reference to texts from authors as diverse as Shakespeare, Goethe, and Virginia Woolf, this collection is admirably broad in its scope and wide-ranging in its geographical coverage. It thinks about the impact of psychoanalysis in a wide variety of literatures as well as in film, and critical and cultural theory.

stop making sense manchester: Lacan and the Posthuman Svitlana Matviyenko, Judith Roof, 2018-04-30 When Posthumanism displaces the traditional human subject, what does psychoanalysis add to contemporary conversations about subject/object relations, systems, perspectives, and values? This book discusses whether Posthumanism itself is a cultural indication of a shift in thinking that is moving from language to matter, from a politics focused on social relations to one organized according to a broader sense of object in environments. Together the authors question what is at stake in this shift and what psychoanalysis can say about it. Promoting psychoanalysis' focus on the cybernetic relationships among subjects, language, social organizations, desire, drive, and other human motivations, this book demonstrates the continued relevance of Lacan's work not only to continued understandings of the human subject, but to the broader cultural impasses we now face. Why Posthumanism? Why now? In what ways is Posthumanist thought linked to the emergence of digital technologies? Exploring Posthumanism from the insights of Lacan's psychoanalysis, chapters expose and elucidate not only the conditions within which Posthumanist thought arises, but also reveal symptoms of its flaws: the blindness to anthropomorphization, projection, and unrecognized shifts in scale and perspective, as well as its mode of transcendental thought that enables many Posthumanist declarations. This book explains how Lacanian notions of the subject inform current discussions about human complicity with, and resistance to, algorithmic governing regimes, which themselves more wholly produce a "post"-humanism than any philosophical displacement of human centrality could.

stop making sense manchester: Making Sense of Paranoia Peter Bullimore, Ian Warwick, Kenneth McLaughlin, 2023-01-03 Making Sense of Paranoia provides a refreshing and challenging contribution to debates over mental health. Mainstream psychiatric texts tend to foreground medical explanations for mental distress, with the direct experiences and personal narratives of the sufferers themselves then used as evidence to substantiate pre-existing concepts. This book takes a radically different approach. Here, the personal narratives of sufferers are prioritised and then the prevailing theoretical frameworks are examined to see if they fit with the sufferers' lifeworld, rather than the other way round. Seen from this perspective, it is argued that we require alternative ways to conceptualise paranoia and new forms of intervention to alleviate the suffering of those who experience distressing beliefs. What the contributors to this book have in common is their direct experience of paranoia, either through lived experience, the provision of professional support, or through developing new theoretical explanations to help us understand both the influences on, and experience of, paranoia.
