the jumblies by edward lear: Inventing Edward Lear Sara Lodge, 2018-11-30 "Inventing Edward Lear is an exceptional, valuable, original study, presenting new materials on aspects of Lear's life and work." —Jenny Uglow, author of *Mr. Lear and The Lunar Men* Edward Lear wrote some of the best-loved poems in English, including "The Owl and the Pussycat," but the father of

nonsense was far more than a poet. He was a naturalist, a brilliant landscape painter, an experimental travel writer, and an accomplished composer. Sara Lodge presents the fullest account yet of Lear's passionate engagement in the intellectual, social, and cultural life of his times. Lear had a difficult start in life. He was epileptic, asthmatic, and depressive, but even as a child a consummate performer who projected himself into others' affections. He became, by John James Audubon's estimate, one of the greatest ornithological artists of the age. Queen Victoria—an admirer—chose him to be her painting teacher. He popularized the limerick, set Tennyson's verse to music, and opened fresh doors for children and adults to share fantasies of magical escape. Lodge draws on diaries, letters, and new archival sources to paint a vivid picture of Lear that explores his musical influences, his religious nonconformity, his relationship with the Pre-Raphaelite movement, and the connections between his scientific and artistic work. He invented himself as a character: awkward but funny, absurdly sympathetic. In Lodge's hands, Lear emerges as a dynamic and irreverent polymath whose conversation continues to draw us in. *Inventing Edward Lear* is an original and moving account of one of the most intriguing and creative of all Victorians.

the jumblies by edward lear: *The Natural History of Edward Lear, New Edition* Robert McCracken Peck, 2021-04-13 Edward Lear is well known as the brilliant writer of nonsense poetry, children's books, and travel books who popularized the limerick, and wrote verses such as *The Owl* and *the Pussycat*. But few people are aware that Lear was one of the most talented and accomplished painters of natural history subjects in the nineteenth century, and worked with British scientists, collectors, and publishers to make Britain the nexus for scientific investigation and its circulation. One of the best ornithological artists of his generation, Lear published his first book, a monograph on the parrot family, at age 18, and established a format that would be followed by decades by such publishers as John Gould, with whom he worked closely and often anonymously. Over his career, Lear produced a multitude of drawings of birds and mammals from around the world for scientific publications, public institutions, and individual patrons, not just of English species, but of birds and mammals from Australia, New Zealand, and the Americas. He is also the Lear in the name of the rare species Lear's Macaw. In this book, Peck has assembled the first comprehensive view of this important part of Lear's career. Featuring over 200 illustrations and a foreword by Sir David Attenborough, the book also examines the influence Lear had on modern artists such as Walton Ford and Tony Foster. This new edition includes a new chapter that addresses Lear's continued fascination with wildlife and the natural world after giving up his career as a scientific illustrator, and his fascination with domestic pets, from his own beloved cat which he cartooned repeatedly, to the portraits of dogs owned by his family and friends, alongside thirteen never-before-published illustrations, including fully finished watercolors, rough preliminary sketches, and whimsical cartoons--
