It offers a view of parental competence as a social attribute rather than an individual skill, assessing the implications for institutional policies and practices. The authors address the notion of children having to parent their disabled parents and argue for a shift in emphasis from protecting children to supporting families. This innovative book provides a fresh approach to a subject rife with prejudice and challenges us to think again about many taken-for-granted ideas about the process of parenting and the needs of children. It also demonstrates the power of narrative research and its capacity for bringing alive people's experience in a way that enables us to better understand their lives.

Born to Fish tells the tale of a man who led a harrowing, sometimes dissolute life until he turned himself around, thanks to his rod and reel. Overcoming learning disabilities, substance abuse, and the violence associated with a father in the mob, Greg Myerson, a lifelong sport-fisherman, caught an 82-pound striped bass in 2011, shattering a world record that had stood for 29 years. Without any training in biological research, he began studying the striped bass like a scientist—examining how it hunts, the food it eats, how its behavior is affected by moon phases and the cycles of the tides—which led to the creation of the RattleSinker, the lure that helped him catch the record-setting bass. During an appearance on the TV show *Shark Tank*, Mark Cuban bought a 33 percent share of Greg's company, World Record Striper Company. Yet at the very instant he achieved his crowning glory as a striped bass fisherman, he had a staggering epiphany and instantly regretted killing the fish. Greg is now at the forefront of the effort to save the big striped bass, the most prolific breeders, and actively promotes no-kill catch-and-release tournaments.

This fascinating portrait follows Ederle from her early days as a competitive swimmer through her gold medal triumph at the 1924 Olympics, to the first attempt the next year by Ederle to swim from France to England in frigid and turbulent waters, a feat that had been conquered by only five men up to that time. This is also a stirring look at the go-go era of the 1920s, when the country was about to recognize that women not only could vote, but compete on an international scale as athletes. At the height of Prohibition, Ederle's triumph over the formidable Channel was a triumph for women everywhere. *America's Girl* immerses readers in a pivotal era of American history and brings to life the spirit of that time.
