tourist map of sri lanka: Beyond Citizenship and the Nation-State Jocelyn M. Boryczka, Sarah M. Surak, 2023-06-05 Beyond Citizenship and the Nation-State examines tensions between a push

for clear boundaries defining nation-states and who “legitimately” belongs in them and a pull away from citizenship as capturing what membership in a political community looks like in the twenty-first century. Borders signify and represent these physical and metaphorical challenges in a world where (anti)migration and (anti)refugee rhetoric are central to the production and reproduction of postcolonial and nationalist political discourse and identity formation. With an expansive view of citizenship, authors challenge dominant narratives, explore alternatives to neoliberal frameworks, and link theory and practice through participatory opportunities for non-citizen political participation. In doing so, they present possibilities for reimagining citizenship for a just, more sustainable future. This book will appeal to academics and practitioners working in the disciplines of Sociology, Social Policy, Human Geography, Political Sciences, Citizenship Studies and Migration Studies. It was originally published as a special issue of *New Political Science*.

tourist map of sri lanka: *The Routledge Companion to Cultural Text and the Nation* Sheera Talpaz, Anuradha Dingwaney Needham, 2025-03-31 *The Routledge Companion to Cultural Text and the Nation* brings together over 30 articles by leading and emerging scholars from around the world who engage fresh critical lenses, from affect studies to the medical humanities, and re-energize established frameworks to examine the interplay between cultural production and conceptualizations of the nation and nationalism. The scholarship in this volume takes as its objects of analysis various forms of aesthetic and cultural production, from film and literature to museums and costume books, enriching the conversation that has often siloed these forms. Geared toward scholars, graduate students, and upper-level undergraduates across the humanities and social sciences, this timely, interdisciplinary collection is issued at a critical juncture in the transformation of the nation and the global resurgence of regressive and populist nationalist movements. Both offering new insights reorienting our understanding of canonical materials and bringing noncanonical works to light, this volume challenges long-held assumptions about the nation while establishing its continued significance and future possibilities.
