Who Composed The Song Happy Birthday

who composed the song happy birthday: Happy Birthday to . . . Who? Howard Camner, 2019-03-28 There was a time when I had goals and dreams for my life, but now all I do is go to birthday parties. When I'm at these birthday parties, I've noticed that the kids have fun and the women yak it up, but the men are as lost as lost could be. They are absolutely miserable. They remind me of the last scenes of the 1962 cult classic Carnival of Souls where all the lifeless spirits just meander around aimlessly—their vital spark gone, their once-twinkling eyes glazed over. During the week, these guys are attorneys, doctors, high-powered businessmen, pillars of the community, and big shots of all kinds; but on the weekends, at these kids' birthday parties, they are all lost, tormented souls. They are all mere pitiful shadows of their former selves. It soon became obvious to me that these fathers need guidance. I scoured bookstores for something that would help, but there was nothing. Therefore, this book was born out of necessity. It is at once a survival guide, an instruction manual, and a rant and a half. The poet John Donne wrote that no man is an island. This book is my attempt to reach out to my fellow fathers. It is my hope that it will bring us all together and help to end our suffering. No one else has stepped forward. Therefore, I feel it's my duty—no, my mission—to lead all fathers out of the darkness and the nightmare that is children's birthday parties. This book will help us all survive.

who composed the song happy birthday: Crazy Man, Crazy Bill Haley Jr., Peter Benjaminson, 2019-06-30 Bill Haley – the man who brought rock 'n' roll into the mainstream. His song “Crazy Man, Crazy” was the first rock 'n' roll song to break the Billboard Top 20 in 1953 and was followed by his evergreen “We're Gonna Rock Around the Clock ” the first song of its kind to hit #1. His success made him an idol not only in the US but throughout the world, from Canada to the UK, Europe, Australia, Japan, New Zealand, and beyond. Yet Haley is often overlooked in the story of rock 'n' roll, overshadowed by others who followed him, from sex symbol Elvis Presley to wild man Jerry Lee Lewis and forever-young Buddy Holly. But Haley's lack of visibility was in part his own doing: he had conflicted feelings about fame, was extremely private, suffered chronic alcoholism, and troubled relationships with multiple wives, which yielded ten children who he struggled to support. Though he managed to carry on a successful touring career, his demons eventually eroded his health, and in 1981, at the age of only 55, he passed away. This book is written by esteemed biographer Peter Benjaminson and Bill Haley Jr., Haley's son, a musician himself, who tours the world paying tribute to his father's music. Culled from interviews with insiders – from ex-wives to the Comets, recorded conversations with Haley Sr., official documents, diaries, and more, this book not only charts the happenings of Haley's career but gives insight into the Haley behind the curtain and some of the other trials he faced, from the dark side of the music business to ties with Mafia. Featuring a collection of rare photographs, this book is a must-have for any serious rock 'n' roll fan.

In this book, he introduces a cross-section of unsung, dynamic men and women pioneering political and social change. There is the Kuwaiti sex therapist in a leather suit with matching red headscarf, and the Syrian engineer advocating a less political interpretation of the Koran. MacFarquhar interacts with Arabs and Iranians in their every day lives, removed from the violence we see constantly, yet wrestling with the region's future. These are people who realize their region is out of step with the world and are determined to do something about it -- on their own terms.

who composed the song happy birthday: *Intellectual Property Excesses* Enrico Bonadio, Aislinn O'Connell, 2022-06-30 This collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property (IP) may lead to. It collects and comments on a series of IP disputes which have taken the notion of IP protection to extremes. From individuals being sued for hundreds of thousands of dollars for sharing a playlist, to sports spectators being arrested for wearing the 'wrong' dresses, passing through granting patents for inventions obtained by misappropriating traditional knowledge, and trademark protection of merely descriptive signs, this book brings together a broad range of examples from across the IP spectrum where protection and enforcement have been used or threatened on unreasonable and/or untenable grounds. The aim of the book is to criticise these excesses precisely because they harm IP; and because they contribute to creating an environment where more and more people are led to 'hate' IP, and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade, competition and people's freedom. This is not, therefore, a book against IP, it is instead a call for change and an attempt to 'save' IP through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism. The book includes a foreword by Jason Mazzone, Albert E Jenner Jr Professor of Law at the University of Illinois, USA.
