band of brothers dvd box set: American Media and the Memory of World War II Debra Ramsay, 2015-02-11 For three generations of Americans, World War II has been a touchstone for the understanding of conflict and of America's role in global affairs. But if World War II helped shape the perception of war for Americans, American media in turn shape the understanding and memory of World War II. Concentrating on key popular films, television series, and digital games from the last two decades, this book explores the critical influence World War II continues to exert on a generation of Americans born over thirty years after the conflict ended. It explains how the war was configured in the media of the wartime generation and how it came to be repurposed by their progeny, the Baby Boomers. In doing so, it identifies the framework underpinning the mediation of World War II memory in the current generation's media and develops a model that provides insight into the strategies of representation that shape the American perspective of war in general.

band of brothers dvd box set: It's Not TV Felix Gillette, John Koblin, 2022-11-01 "A read so riveting, it's not hard to imagine watching it unfold on Sunday nights." —The Associated Press "An incisive account that is more than a rosy victory lap for one of TV's most influential channels." —Eric Deggans, NPR's "Books We Love" "It's Not TV proves to be a lively companion to all these shows." —Andrew O'Hagan, The New York Review of Books The inside story of HBO, the start-up company that reinvented television—by two veteran media reporters HBO changed how stories could be told on TV. The Sopranos, Sex and the City, The Wire, Game of Thrones. The network's meteoric rise heralded the second golden age of television with serialized shows that examined and reflected American anxieties, fears, and secret passions through complicated characters who were flawed and often unlikable. HBO's own behind-the-scenes story is as complex, compelling, and innovative as the dramas the network created, driven by unorthodox executives who pushed the boundaries of what viewers understood as television at the turn of the century. Originally conceived by a small upstart

group of entrepreneurs to bring Hollywood movies into living rooms across America, the scrappy network grew into one of the most influential and respected players in Hollywood. It's Not TV is the deeply reported, definitive story of one of America's most daring and popular cultural institutions, laying bare HBO's growth, dominance, and vulnerability within the capricious media landscape over the past fifty years. Through the visionary executives, showrunners, and producers who shaped HBO, seasoned journalists Gillette and Koblin bring to life a dynamic cast of characters who drove the company's creative innovation in astonishing ways—outmaneuvering copycat competitors, taming Hollywood studios, transforming 1980s comedians and athletes like Chris Rock and Mike Tyson into superstars, and in the late 1990s and 2000s elevating the commercial-free, serialized drama to a revered art form. But in the midst of all its success, HBO was also defined by misbehaving executives, internal power struggles, and a few crucial miscalculations. As data-driven models like Netflix have taken over streaming, HBO's artful, instinctual, and humanistic approach to storytelling is in jeopardy. Taking readers into the boardrooms and behind the camera, It's Not TV tells the surprising, fascinating story of HBO's ascent, its groundbreaking influence on American business, technology, and popular culture, and its increasingly precarious position in the very market it created.

band of brothers dvd box set: Commando Chris Terrill, 2008-10-14 Chris Terrill is a man in search of his limit. He's 55 years old. He is not a soldier. He is being trained by the Royal Marines and he is going to Afghanistan. The only difference is that instead of a gun, Chris will be holding a camera and filming the whole ordeal for a major TV series. The Royal Marines Commando training base in Lympstone Devon, has a famous motto: '99.9% need not apply'. Of those who start training, after a very tough selection process, nearly 50% fail to make it through the most gruelling physical tests of any armed forces in the world in an eight month training regime. The elite who do eventually pass out are generally eighteen years old and at the peak of physical condition. But Chris Terrill is

the exception: this book will tell of his heroic struggle to become the oldest man to win the coveted Royal Marines Commando Green Beret and enter the record books. And after six months of hell, what next? Chris will follow the raw recruits on a tour to Southern Afghanistan. He will tell the story in book and film of the fears and hopes of the youngsters as they are plunged into one of the planet's most dangerous wars in the outlaw mountain terrain of Helmand Province. He will tell of ferocious battles against the Taliban, of firefights, of jaw-dropping heroism, British sang froid and humour and tragedy as casualties are suffered -- all from the unique perspective of a civilian who has achieved the ultimate accolade: to be accepted as an honorary Royal Marines Commando. Commando is a brilliant account of modern war on the front line.

band of brothers dvd box set: China Underground Zachary Mexico, 2010-08 In the beginning of the twenty-first century, it is hard to imagine a place more exciting than China. The country's economy is growing by more than ten percent per year. The lives of Chinese citizens in every stratum of society are changing--indeed, the very rules that define the parameters of their lives are changing. Over a billion people are simultaneously hustling, trying to decipher the rules, carving a place out for themselves in the new China. Predictably, the result is a glorious mess. Westerners are fascinated with news coming out of China, but in general, most such reporting focuses on the country's economy (growth rates, infrastructure, trade deficits, currency valuation, globalization, etc.), social issues (human rights, income inequality, diseases such as avian flu, SARS, and HIV/Aids, the traditional Chinese culture, mainstream social trends, etc.), and the current government (the workings of the CCP, its response to social unrest, etc.). Westerners hear much about China's booming economy and its role as the next global superpower from the mainstream media, but they know less about the young people who make up China's varied and fascinating subcultures. In China Underground, Mexico introduces young western readers to their Chinese counterparts, highlighting an unfamiliar side of China: today's varied youth cultures, which are both fascinating and under-exposed. Readers are introduced to a wannabe rock star from the desert of Xinjiang, trying to make it big in Shanghai; a disillusioned journalist; a budding screenwriter; a vagabond ladies' man; a straight-A student at China's best university; a Chinese mafia kingpin; a punk band trying their best to stay relevant; a prostitute; the world's most polluted city; Beijing's drug-fueled club scene, and many others.

Norman Drummond draws on his wide experience as a headteacher, as a minister and as an internationally respected coach in life and business to bring home the fundamental lesson he has learned both for himself and for others: we can't hope to achieve our potential unless we take time out to work out what is most important to us. Whether for a few minutes or for a few days, alone or with others - Drummond shows how easy and how effective stepping back can be. Most importantly, he focuses on the rich rewards of stepping back: clarity of thought, stronger objectives - and the ability to discern the true priorities of your own heart. STEP BACK is an essential book for a culture that is unable to rest and relax

Bullinger, 2019-10-10 During the 1980s and 1990s, aging Baby Boomer parents constructed a particular type of memory as they attempted to laud their own parents' wartime accomplishments with the label The Greatest Generation. This book is the first to tell the entire story of this particular type of U.S. World War II memory begun by U.S. President Ronald Reagan in 1984, and promoted the same year by newscaster Tom Brokaw. The story continues in 1994, when it was given academic credence by historian Stephen E.
