David Vincent Meconi, S.J., 2021-08-26 Augustine of Hippo's The City of God is generally considered to be one of the key works of Late Antiquity. Written in response to allegations that Christianity had brought about the decline of Rome, Augustine here explores themes in history, political science, and Christian theology, and argues for the truth of Christianity over competing religions and philosophies. This Companion volume includes specially-commissioned essays by an international team of scholars that provide new insights into The City of God. city of god st augustine: The City of God, Books VIII-XVI Saint Augustine, 2008-09 This volume continues the translation of St. Augustine's monumental work The City of God, a product of his vast erudition. Three books in particular, viz. 8, 9, and 10, reveal Augustine's grasp of the tenets of the Platonists, Peripatetics and Cynics. The greater part of this continuation, however, is concerned with Augustine's treatment of theological and scriptural topics. There is no strictly logical sequence, however, and numerous digressions intervene. In the course of books 11 and 16, he finds occasion to discuss, among many other topics, the creation of angels and their nature, demons and evils, the age of the earth and of the human race, death and dying, and the purpose of marriage. From the discussion of such topics, he passes easily to comments on the Hebrew and Greek texts of the Bible, the accuracy of the Septuagint and Latin translations, the discrepancies among various texts. As a product of his times, Augustine shares the opinion that Hebrew may be the oldest, and perhaps most common, language before the Tower of Babel incident recorded in Scripture. Most of Augustine's treatment of scriptural passages is concerned with allegorical interpretation. In book 14, however, the former professor of rhetoric at Milan comes through again in his discussion of the semantics of the words *caritas*, *amor*, *dilago*, and *amo*.

city of god st augustine: City of God Saint Augustine, 2022-05-17 Saint Augustine's City of God is a monumental work that intricately weaves philosophy, theology, and history, articulating a profound vision of the relationship between faith and society. Written in response to the fall of Rome in 410 AD, Augustine contrasts the earthly city, characterized by human sin and imperfection, with the divine city, symbolizing the eschatological community of believers. His eloquent prose and rhetorical mastery invite readers to explore themes of justice, providence, and the ultimate end of humanity, situated within the tumultuous context of a crumbling Roman Empire. Through a dialectical method, Augustine examines the moral crises of his time, providing a compelling narrative that still resonates with contemporary discussions about politics and spirituality. Saint Augustine, a pivotal figure in Western philosophy and Christian thought, drew from a diverse background as a former Manichean and Neoplatonist before embracing Christianity. His extensive writings reflect his intellectual rigor and personal struggles with faith, which undoubtedly influenced his examination of human society in City of God. Augustine's experiences as a bishop of Hippo also offered him intimate insights into the ethical dilemmas and spiritual crises faced by early Christians in a declining Roman civilization. City of God is an essential read for anyone seeking to understand the foundations of Western thought regarding the interplay between religion and society. It offers timeless reflections on the nature of human existence, morality, and the quest for a transcendent purpose. Readers will find Augustine's insights to be not only historically significant but also deeply relevant to the ethical and spiritual challenges of our own age.

city of god st augustine: The City of God St. St. Augustine, 2017-07-29 How is this book unique? Font adjustments & biography included Unabridged (100% Original content) Illustrated About The City of God by St. Augustine The City of God is a book of Christian philosophy written in

Latin by St. Augustine in the early 5th century AD. The book was in response to allegations that Christianity brought about the decline of Rome and is considered one of Augustine's most important works, standing alongside *The Confessions*, *The Enchiridion*, *On Christian Doctrine* and *On the Trinity*. As a work of one of the most influential Church Fathers, *The City of God* is a cornerstone of Western thought, expounding on many profound questions of theology, such as the suffering of the righteous, the existence of evil, the conflict between free will and divine omniscience, and the doctrine of original sin. The book presents human history as a conflict between what Augustine calls the Earthly City (often colloquially referred to as the City of Man) and the City of God, a conflict that is destined to end in victory for the latter. The City of God is marked by people who forgot earthly pleasure to dedicate themselves to the eternal truths of God, now revealed fully in the Christian faith. The Earthly City, on the other hand, consists of people who have immersed themselves in the cares and pleasures of the present, passing world. Augustine's thesis depicts the history of the world as universal warfare between God and the Devil. This metaphysical war is not limited by time but only by geography on Earth. In this war, God moves (by divine intervention/ Providence) those governments, political /ideological movements and military forces aligned (or aligned the most) with the Catholic Church (the City of God) in order to oppose by all means--including military--those governments, political/ideological movements and military forces aligned (or aligned the most) with the Devil (the City of Devil).
