college of psychic studies: *The Perfect Medium* Clément Chéroux, Andreas Fischer, Pierre Apraxine, Denis Canguilhem, Sophie Schmit, 2005-01-01 In the early days of photography, many believed and hoped that the camera would prove more efficient than the human eye in capturing the unseen. Spiritualists and animists of the nineteenth century seized on the new technology as a method of substantiating the existence of supernatural beings and happenings. This fascinating book assembles more than 250 photographic images from the Victorian era to the 1960s, each purporting to document an occult phenomenon: levitations, apparitions, transfigurations, ectoplasms, spectres, ghosts, and auras. Drawn from the archives of European and American occult societies and private and public collections, the photographs in many cases have never before been published. The Perfect Medium studies these rare and remarkable photographs through cultural, historical, and artistic lenses. More than mere curiosities, the images on film are important records of the cultural forces and technical methods that brought about their production. They document in unexpected ways a period when developing photographic technology merged with a popular obsession with the occult to create a new genre of haunting experimental photographs.

college of psychic studies: The Kundalini Concept Mary Scott, 2007-08 It is very important that we come to a clear understanding of what kundalini is and what it is not. This becomes especially important in the light of the greatly increased interest in the West in the practice of various kinds of yogas. Much harm can come in the attempts to 'arouse kundalini' if there is not the corresponding practice of progressive freedom from egocentrism. Mary Scott has done an admirable job in clarifying the subject by delving into the context in which the notions of kundalini and chakras were developed. In addition to the sympathetic reading of Aurobindo and Woodroffe, who seems to have been one of the few Westerners who tried to understand the Tantras in their Indian expositions as expounded by the Tantrik masters themselves rather than impose extraneous theories of one's own, the author brings a great deal of common sense and her own personal experience of being a searcher as well as a psychotherapist. If taken seriously, this book should provide a great challenge to the general methodology of contemporary sciences. Highly recommended for scholars and lay persons alike. --Prof. Ravi Ravindra

college of psychic studies: The Mysterious Story of X7 Anonymous, 2011-06-28 Between 1953 and 1957, a group of political prisoners, codenamed X7, were incarcerated in a Siberian salt mine. They linked up telepathically with the Network of Light, groups of psychics stationed worldwide, and transmitted their story. Trapped for years deep in the earth, they began to refine the vibratory rate of the body and of surrounding matter until they could experience themselves as beings of Light—and experience Earth itself as Light. Their transmissions were transcribed by gifted American psychic Anne Edwards, future cofounder of the Scottish spiritual community Findhorn. In the 1970s, Edwards' reports fell into the hands of British New Age leader Sir George Trevelyan, whose

publication of them stirred up controversy in both mainstream and alternative communities. In this new edition, Robert Sardello not only explains the spiritual significance of these esoteric writings, but also guides readers through a process much like that described in the book. Sardello's commentary enables readers to use the book as a guide to a path for transforming humankind and the earth, and argues persuasively that enacting this process at this moment in human history is crucial to survival and transcendence.

college of psychic studies: My Double Life 2 Nicholas Hagger, 2015-06-07 In My Double Life 1 Nicholas Hagger told of his four years' service and double life as an undercover British intelligence agent during the Cold War (there revealed for the first time). Lost in a dark wood like Dante following his encounters with Gaddafi's Libya and the African liberation movements, he found Reality on a 'Mystic Way' of loss, purgation and illumination, perceived the universe as a unity and had 16 experiences of the metaphysical Light. In My Double Life 2 he continues the story. He received new powers, coped with fresh ordeals, acquired three schools, renovated a historic house, and had 76 further experiences of the metaphysical Light. He founded a new philosophy of Universalism and new approaches to contemporary history, international statecraft and world literature. He produced nearly 1,500 poems, over 300 classical odes, five verse plays, two poetic epics, over a thousand short stories - and 40 books that include innovative literary, historical and philosophical works. His vision of Universalism in seven disciplines is like a rainbow with seven bands overarching seven hills. college of psychic studies: *Science and the Paranormal* Arthur J. Ellison, 2020-01-07 Ellison was . . . a dedicated paranormal researcher who believed the science was too narrow to account for things like out-of-body experiences (io9). In facts, not fiction, this book presents the case for the paranormal. Changing the way we look at the universe is not easy, and requires a true openness to exploration and experiment. Professor Ellison suggests that most of us are conditioned by our Western science-based education to think that the universe is much simpler and 'material' than it really is. He argues that we should recognize the limits of the current scientific worldview that fails to account for genuine paranormal experiences, including phenomena such as out-of-body experiences (OBE), reliably reported by thousands of people. *Science and the Paranormal* is part of *The Paranormal*, a series that resurrects rare titles, classic publications, and out-of-print texts, as well as publishes new supernatural and otherworldly ebooks for the digital age. The series includes a range of paranormal subjects from angels, fairies, and UFOs to near-death experiences, vampires, ghosts, and witchcraft. A most valuable work and a lasting testimony to the author's remarkable contribution to the field. —Bernard Carr, Scientific and Medical Network Review Written for the lay person in down-to-earth language . . . this book is for those who want a broad-brush of matters like the evidence for telepathy, near death experiences, survival research etc. without having to plough through a century-high stack of scientific papers. A welcome introduction to human nature's further reaches. — Christian Parapsychologist

college of psychic studies: The Premonition Code Theresa Cheung, Dr Julia Mossbridge, 2018-10-16 An in-depth study into the cutting-edge science of 'sensing' the future, or precognition—from a cognitive neuroscientist and the bestselling author of *The Dream Dictionary* In this groundbreaking book, bestselling author Theresa Cheung joins forces with cognitive neuroscientist Julia Mossbridge, PhD, Director of the Innovation Lab at The Institute of Noetic Sciences (IONS).
