ken fox wall of death: The Wall of Death: Carnival Motordromes David Gaylin, 2017 In 1911,

the operators of Coney Island's Luna Park premiered a miniature, radically banked racetrack for staged automobile races that seemed to defy gravity. For a fee, patrons would watch from the perimeter of the 85-foot wooden saucer as daredevil drivers raced on the steep angle of the tiny track. The attraction created a sensation and was quickly copied with a show that featured motorcycle riders performing breathtaking stunts. When portable versions were made available, every traveling carnival owner in the United States rushed to have one. Motordromes with perfectly vertical walls soon followed, which permitted riders on their Indian motorcycles to climb, sometimes to a height of 20 feet, with nothing but centrifugal force between them and a trip to the trauma ward. And when full-grown lions were added to pursue riders in the arena, no one could resist buying a ticket! The Wall of Death, a name these shows received in 1917, remained a staple attraction on American carnival midways until the 1970s.

ken fox wall of death: Guy Martin: Worms to Catch Guy Martin, 2016-10-20 'I was never going to sleep in and take it easy, there were worms to catch.' Breaking records on the world's biggest Wall of Death, cycling 2,745 miles across the length of the United States (while sleeping rough), attempting to be the fastest person ever on two wheels and travelling to Latvia to investigate his family's roots, it's been a busy year for Guy Martin. There's been some thrilling racing too, including wild Harley choppers on dirt and turbo-charged Transit vans through the Nevada desert. And don't forget there's the day job to get back to in North Lincolnshire - the truck yard and the butty van. Guy has done more in one year than most people do in a lifetime, and with his gift for story-telling, he takes you with him to the outer limits of human endurance, and on a dizzying adrenalin high, all in a day's work.

ken fox wall of death: Guy Martin: When You Dead, You Dead Guy Martin, 2015-10-22 'The maddest 12 months of my life. The journey starts with an oddball race up an American mountain and ends with me checking myself out of hospital with a broken back. Again ...' As Guy's Latvian grandfather frequently reminded him, 'When you dead, you dead'. So before it's all over, Guy Martin is making the most of the time he's got. In this past year alone, Guy has raced the Isle of Man TT and finished on the podium; bike trekked through India; competed in solo 24-hour bicycles races; flown a stunt plane; broken a go-kart speed record down a French mountain and attempted to break the motorcycle land-speed record at Bonneville Salt Flats. And he's done all this around his day job as a truck mechanic. But let Guy tell you about it himself: 'This book starts in a Transit, ends in a Transit, and in between I've raced a few pushbikes, raced a few motorbikes and got a fair few stories to tell you.' Spot on.

ken fox wall of death: Dead Men Don't Tell Tales Guy Martin, 2021-10-28 Guy Martin can't sit still. He has to keep pushing - both himself and whatever machine he is piloting - to the extreme. He's a doer, not a talker. That applies whether Guy's competing in a self-supported 750-mile mountain bike race across Arizona, or trying to reach 300mph in a standing mile on the 800-horsepower motorbike he built in his shed. And during his TV adventures, travelling through Japan, winning records for the world's fastest tractor, re-creating the famous Steve McQueen Great Escape jump, discovering the toil and sacrifice of the D-Day landings and trying to cut the mustard as a Battle of Britain pilot. Guy's become a dad now and he's hoping that one day his daughter will grow up to be a better welder than he is. Oh, and he's still getting up at 5am to work on trucks in for service or to be out on his tractor, working the Lincolnshire land he's always called home. This is Guy Martin's latest book, in his own words, on the last four years of his life that make the rest of us look like we're in slow motion. We're here for a good time, not a long time. To Guy, if it's worth doing, it's worth dying for.

Maybe I'm wearing everything out, but I believe the body is a fantastic thing and it will repair itself and I'll go again. If it's running too rich, I don't stop what I'm doing, just weaken the mixture and carry on.' Since we last heard from him, Guy Martin has restored a 1983 Williams F1 car then raced Jenson Button in it; helped to build a First World War tank; ridden with Putin's

favourite biker gang the Night Wolves; competed on the classic endurance circuit; stood on top of one of Chernobyl's nuclear reactors and taken part in his last ever Isle of Man TT. Then there's the stuff he really can't wait to get out of bed for: 12-hour shifts for a local haulage firm and tatie farming in his new John Deere tractor. Besides all this, he's saved his local pub from closure and become a dad. But let him tell you his own stories, in his own words: 'You're getting it from the horse's mouth. No filter. I hope you enjoy it.'

ken fox wall of death: Collaboration in Performance Practice Noyale Colin, Stefanie Sachsenmaier, 2016-04-29 Collaboration between artists has been practised for centuries, yet over recent decades the act of collaborating has taken different meanings. This publication examines cultural, philosophical and political issues tied to specific instances of collaborative practice in the performing arts. Leading scholars and practitioners review historical developments of collaborative practice and reveal what it means to work together in creative contexts at the beginning of the twenty-first century. Key questions addressed include how artists are developing new ways of working together in response to contemporary economic trends, the significance of collaborating across culture and what opportunities are apparent when co-working between genres and disciplines. Noyale Colin and Stefanie Sachsenmaier present these perspectives in three thematic sections which interrogate the premises of collective intentions, the working strategies of current practitioners, as well as the role of failure and compromise in collaborative modes of creative work. This volume is an invaluable resource for scholars, practitioners and those interested in contemporary artistic methods of working.
