marilyn monroe interesting facts: A Referential Theory of Truth and Falsity Ilhan Inan, 2022-05-03 This book proposes a novel theory of truth and falsity. It argues that truth is a form of reference and falsity is a form of reference failure. Most of the philosophical literature on truth concentrates on certain ontological and epistemic problems. This book focuses instead on language. By utilizing the Fregean idea that sentences are singular referring expressions, the author develops novel connections between the philosophical study of truth and falsity and the huge literature in the philosophy of language on the notion of reference. The first part of the book constructs the author's theory and argues for it in length. Part II addresses the ways in which the theory relates to, and is different from, some of the basic theories of truth. Part III takes up how to account for the truth of sentences with logical operators and quantifiers. Finally, Part IV discusses the applications and implications of the theory for longstanding problems in philosophy of language, metaphysics, and epistemology. A Referential Theory of Truth and Falsity will appeal to researchers and advanced

students working in philosophy of language, epistemology, metaphysics, and linguistics.

marilyn monroe interesting facts: *The New Tractatus* Bruce Fleming, 2007 Ludwig Wittgenstein's *Tractatus Logico-Philosophicus* was informed by the belief that it was possible to get clarity once and for all on fundamental philosophical issues, and so to think our way to a silence where philosophy was no longer necessary. This is *The New Tractatus*: it sympathizes with Wittgenstein's impatience with the endless cycle of argument, but reacts to this impatience and takes it in different directions than Wittgenstein did. Wittgenstein was concerned with questions like these: What is the meaning of language? What is our relationship to the universe? What is the nature of philosophy? These questions are covered in *The New Tractatus*, along with many other topics, such as: Why is sex a controversial issue? Why are we so interested in celebrities? What is the nature of love? Why do liberals and conservatives argue about so many things? What is magic? Can miracles occur? Is science objective? Does art lie to us? How do we win arguments? What is the meaning of life? What *The New Tractatus* shares with the old is the fundamental perception that we can never transcend what is. The world is all that is the case: whatever comes to be is part of the world.

marilyn monroe interesting facts: *Sweet Dreams* Daniel C. Dennett, 2006-09-08 In the years since Daniel Dennett's influential *Consciousness Explained* was published in 1991, scientific research on consciousness has been a hotly contested battleground of rival theories—so rambunctious, Dennett observes, that several people are writing books just about the tumult. With *Sweet Dreams*, Dennett returns to the subject for revision and renewal of his theory of consciousness, taking into account major empirical advances in the field since 1991 as well as recent theoretical challenges. In *Consciousness Explained*, Dennett proposed to replace the ubiquitous but bankrupt Cartesian Theater model (which posits a privileged place in the brain where it all comes together for the magic show of consciousness) with the Multiple Drafts Model. Drawing on psychology, cognitive neuroscience, and artificial intelligence, he asserted that human consciousness is essentially the mental software that reorganizes the functional architecture of the brain. In *Sweet Dreams*, he recasts the Multiple Drafts Model as the fame in the brain model, as a background against which to examine the philosophical issues that continue to bedevil the field. With his usual clarity and brio, Dennett enlivens his arguments with a variety of vivid examples. He isolates the Zombic Hunch that distorts much of the theorizing of both philosophers and scientists, and defends heterophenomenology, his third-person approach to the science of consciousness, against persistent misinterpretations and objections. The old challenge of Frank Jackson's thought experiment about Mary the color scientist is given a new rebuttal in the form of RoboMary, while his discussion of a famous card trick, The Tuned Deck, is designed to show that David Chalmers's Hard Problem is probably just a figment of theorists' misexploited imagination. In the final essay, the intrinsic nature of qualia is compared with the naively imagined intrinsic value of a dollar in *Consciousness—How Much is That in Real Money?*

Novelli, 2024 Frank Wetta and Martin Novelli's *Abraham Lincoln and Women on Film* examines how depictions of women in Hollywood movies helped create the myth of Lincoln. They specifically explore D. W. Griffith's *Abraham Lincoln* (1930); John Ford and Larmar Trotti's *Young*

Mr. Lincoln (1939); Robert Sherwood's Abe Lincoln in Illinois (1940); Shirley Temple's The Littlest Rebel (1933) and The Blue Bird (1940); and Stephen Spielberg's Lincoln (2012). In addition, they analyze four television productions: James Agee's Abraham Lincoln (1955); Carl Sandburg's Lincoln (1974); James Prideaux's The Last of Mrs. Lincoln (1976); and Gore Vidal's Lincoln (1988). In studying these depictions, Wetta and Novelli focus on the female characters. They are especially interested in female characters' backstories, the political and cultural climate in which the films appeared, and the contest between the moviemakers' imaginations and the varieties of historical truth. The women of Lincoln's life are the center of the study-his mother, Nancy Hanks Lincoln; his stepmother, Sarah Bush Lincoln; his lost loves, Ann Rutledge and Mary Owens; and his wife and widow, Mary Todd Lincoln. Later, while exploring Lincoln's legacy, Wetta and Novelli focus on the 1930s child star Shirley Temple and the 1950s movie star Marilyn Monroe, the latter of whom had a well-publicized fascination with the sixteenth president. Wetta and Novelli's work is the first to deal extensively with the women in Lincoln's life on screen. They are also among the first to examine how scholarly and popular biography influenced films about Lincoln and added to the creation of popular depictions of him. Abraham Lincoln and Women on Film will find a wide readership among Lincoln scholars and academics who study film and popular culture--

marilyn monroe interesting facts: THE JFK FILES Peter Kross, 2019-02-12 In October 2017, 2,800 files about the 1963 murder were made public for the first time, bringing to the fore revelations that an alleged Cuban intelligence officer met Lee Harvey Oswald in Mexico City, and praised his shooting ability, and that the Soviet spy agency KGB believed then-Vice President Lyndon Johnson may have conspired to assassinate Kennedy. On April 26, 2018, the U.S. Government released 19,000 newly declassified government documents on the Kennedy assassination. It is said that investigators learned little, except that the government's ideas about what needs to be secret, and what doesn't, are cryptic and unpredictable. Some stuff in the documents that had been open for years is now classified again, and some stuff that had been classified and is now open is so innocuous that nobody can figure out what the point was. In some cases, the documents had re-redacted material that had already been declassified in previous versions. Often that seemed to reflect Trump administration sensitivities to the feelings of foreign governments. A 1975 CIA report on the surveillance of shooter Lee Harvey Oswald during his visit to the Soviet embassy in Mexico City just a few weeks before Kennedy's death was released years ago identifying a particular photo as coming from "a Mexican police surveillance camera." In the same document, re-released April 26, the words "Mexican police" had been covered over. Why are these documents even more redacted than previously known versions of the same document? What astonishing information was released by the documents, if any? Why aren't all of the documents released in their entirety without any information redacted? Are the intelligence agencies afraid they will look incompetent and unable to protect the President? Or do they further confirm that Vice President Lyndon Johnson was involved in the assassination as earlier documents suggested?
