Journalist and cultural critic De Stefano takes a look at the origins and prevalence of the Mafia mythos in America. Beginning with a consideration of Italian emigration in the early twentieth century and the fear and prejudice--among both Americans and Italians--that informed our earliest conception of what was the largest immigrant group to enter the United States, De Stefano explores how these impressions laid the groundwork for the images so familiar to us today and uses them to illuminate and explore the variety and allure of Mafia stories. At the same time, he addresses the lingering power of the goodfella cliché, which makes it all but impossible to green-light a project about the Italian American experience not set in gangland.--From publisher description.

In Europe, the regulation of major rivers, the digging of canals and the wetland reclamation schemes from the sixteenth to nineteenth centuries, generated new typologies of waterscapes with significant implications for the people who resided within them. This book explores the role of waterways as a form of heritage, culture and sense of place and the potential of this to underpin the development of cultural tourism. With a multidisciplinary approach across the social sciences and humanities, chapters explore how the control and management of water flows are among some of the most significant human activities to transform the natural environment. Based upon a wealth and breadth of European case studies, the book uncovers the complex relationships we have with waterways, the ways that they have been represented over recent centuries and the ways in which they continue to be redefined in different cultural contexts. Contributions recognise not only valuable assets of hydrology that are at the core of landscape management, but also more intangible aspects that matter to people, such as their familiarity, affecting what is understood as the fluvial sense of place. This highly original collection will be of interest to those working in cultural tourism, cultural geography, heritage studies, cultural history, landscape studies and leisure studies.

Gianos, 1998-01-26 Films have been a part of U.S. society for a century—a source of great enjoyment for the audience and of great profit to filmmakers. How does a mass entertainment medium deal with some of the great sources of dramatic real-life political and economic conflict—the Great Depression, the Cold War—in a way that attracts an audience without making it angry? How does an industry, which has from its beginnings been the subject of attacks from social, political and religious groups deal with political issues and conflicts? This book is an attempt to examine these

questions; it is also an examination of some of the greatest and most interesting American films ever made—westerns, gangster films, comedies, war films, satires, and film biographies—to see what American films say about politics and politicians, and what these films, in turn, say about the audience for which they were produced.
