part of their world: The New World Government-Structure and Constitution Prof. Dr. D. Swaminadhan, 2019-03-24 Two issues are bothering the humanity at present. Secondly, existing global institutions are proving to be wanting in their structures and authorities in solving these problems. Alternatively, a new global independent organization with enforcing authority is needed to act upon and solve these issues. The need for replacement of UNO seems to be justified because of failure to solve global problems. The nineteenth and twentieth centuries witnessed revivals of proposals for world government that were fueled by positive developments, such as technological progress in travel and communications that enabled rapid economic globalization as well as negative developments such as the devastating impact of wars fought with modern technology. The author's approach of the formation of the world parliament is through proportional representation of nation's parliaments, thus avoids direct election process for its formation.
