poems about loving a friend: *The Loving Subject* Gerald A. Bond, 2016-11-11 Gerald Bond explores the rise of a new secular identity that took place in French elite culture at the turn of the twelfth century. While the period is widely recognized as pivotal, and much revisionary work has been done on it, Bond notes that in order to see the changes in the conception of the private secular self the focus must be shifted away from epics and saints' lives, the traditional targets of literary inquiry, to lyric, letters, and marginal texts and images. Such texts and images can be found at regional courts reasonably independent of the weak and limited monarchy and at schools far removed from the traditional Christian curriculum, where a new and distinctly secular group contested inherited values of class, gender, and person and created distinct patterns and codes of dress, behavior, talk, and pleasure. Translating and using sources that for the most part have never been explored, Bond examines the Bayeux Tapestry and such figures as Marbod of Rennes, Baudri of Bourgueil, William of Poitiers, and Adela of Blois to frame a complex view of the contested reconception of the secular self and its value.

poems about loving a friend: Romantic Friendship in Victorian Literature Dr Carolyn W de la L Oulton, 2013-04-28 Carolyn Oulton recovers the strategies nineteenth-century authors used to justify the ideal of same-sex romantic friendship and the anxieties these strategies reveal. Informed by recent insights into the erotic potential of such relationships, but focused on romantic friendship as an independent and fully formulated ideal, Oulton departs from other critics who view romantic friendship as either nebulous and culturally naive or an invocation of homoerotic responsiveness. By considering both male and female friendships, Oulton uncovers surprising parallels between them in novels and poetry by authors such as Dickens, Tennyson, Disraeli, Charlotte Brontë, and Braddon. Oulton also examines conduct manuals, periodicals, and religious treatises, tracing developments from mid-century to the fin de siècle, when romantic friendship first came under serious attack. Her book is a persuasive challenge to those who view mid-Victorian England, existing in a state of blissful pre-Freudian innocence, as unproblematically accommodating of passionate same-sex relationships.

poems about loving a friend: The Social Imagination of the Romantic Wife in Literature Linda L. Reesman, 2024-11-22 The emergence of social change in the daily lives of English society appeared most noticeably through the Romantic-era response of human emotions to a period of reason that has defined the era of Enlightenment, scientifically and philosophically. Remarkably, the dramatic political shift that occurred in 1789 from a French monarchy to a constitutional democracy foreshadowed social changes to the family unit that were more slowly evolving throughout England during the eighteenth century. An intellectual movement to educate all members of society strengthened efforts to loosen ecclesiastical control, allowing more secular definitions of social roles to emerge. The nature of marriage during this period in England is central to understanding how the marriage covenant became a widely accepted civil contract. Examining the sentiments of passion and virtue, the dynamics of traditional marriage emerge through newly established perspectives. The role of the wife as a Romantic-era concept tells the story of two women through their married lives and literary identities. The social imagination provides a new perspective on domestic concerns to illuminate a feminine aspect of the literary market through an understanding of the ordinary wife among female writers. Moreover, a specific focus on marriage, virtue, and friendship as seen through two relationships examines individuals who define both a traditional and a non-conforming approach to their domestic lives. Two husbands who were political and religious activists with wives who were atypical domestics were chosen to exemplify the effects of social change on their particular lives and marital roles in an expanding literary world.
