Introduction to the Novel

The Hunt for October is set against the tense backdrop of the Cold War, a period characterized by espionage, nuclear brinkmanship, and military paranoia. The story revolves around a Soviet submarine, the Akula-class Soviet submarine Dmitry D. Furmanov, and the covert efforts of both Soviet and American naval forces to control or neutralize it. The novel's central plot involves the Soviet captain, Marko Ramius, who plans to defect to the United States with the submarine, seeking political asylum and a new life free from Soviet repression.

the hunt for october: The Encyclopedia of Epic Films Constantine Santas, James M. Wilson, Maria Colavito, Djoymi Baker, 2014-03-21 Soon after film came into existence, the term epic was used to describe productions that were lengthy, spectacular, live with action, and often filmed in exotic locales with large casts and staggering budgets. The effort and extravagance needed to mount an epic film paid off handsomely at the box office, for the genre became an immediate favorite with audiences. Epic films survived the tribulations of two world wars and the Depression and have retained the basic characteristics of size and glamour for more than a hundred years. Length was, and still is, one of the traits of the epic, though monolithic three- to four-hour spectacles like *Gone with the Wind* (1939) and *Lawrence of Arabia* (1962) have been replaced today by such franchises as the Harry Potter films and the Lord of the Rings trilogy. Although the form has evolved during many decades of existence, its central elements have been retained, refined, and modernized to suit the tastes of every new generation. The Encyclopedia of Epic Films identifies, describes, and analyzes those films that meet the criteria of the epic—sweeping drama, panoramic landscapes, lengthy adventure sequences, and, in many cases, casts of thousands. This volume looks at the wide variety of epics produced over the last century—from the silent spectacles of D. W. Griffith and biblical melodramas of Cecil B. DeMille to the historical dramas of David Lean and rollercoaster thrillers of Steven Spielberg. Each entry contains: Major personnel behind the camera, including directors and screenwriters Cast and character listings Plot summary Analysis Academy Award wins and nominations DVD and Blu-ray availability Resources for further study This volume also includes appendixes of foreign epics, superhero spectaculars, and epics produced for television, along with a list of all the directors in the book. Despite a lack of overall critical recognition and respect as a genre, the epic remains a favorite of audiences, and this book pays homage to a form of mass entertainment that continues to fill movie theaters. The Encyclopedia of Epic Films will be of interest to academics and scholars, as well as any fan of films made on a grand scale.

the hunt for october: The Cold War on Film Paul Frazier, 2021-07-12 The Cold War on Film illustrates how to use film as a teaching tool. It stands on its own as an account of both the war and the major films that have depicted it. Memories of the Cold War have often been shaped by the popular films that depict it—for example, *The Manchurian Candidate*, *The Hunt for Red October*, and *Charlie Wilson's War*, among others. The Cold War on Film examines how the Cold War has been

portrayed through a selection of 10 iconic films that represent it through dramatization and storytelling, as opposed to through documentary footage. The book includes an introduction to the war's history and a timeline of events. Each of the 10 chapters that follow focuses on a specific Cold War film. Chapters offer a uniquely detailed level of historical context for the films, weighing their depiction of events against the historical record and evaluating how well or how poorly those films reflected the truth and shaped public memory and discourse over the war. A comprehensive annotated bibliography of print and electronic sources aids students and teachers in further research.
