This book investigates the distinctive qualities of regional Indian cuisines and the ways in which they might be utilized in quantity food production, which refers to the preparation of food on a big scale for places such as organisations, festivals, or commercial businesses. By concentrating on the culinary traditions of North, South, East, West, and Northeast India, the research demonstrates the adaptation of traditional recipes to large-scale operations without sacrificing the authenticity, flavor, or nutritional content of the dishes. Through this research, the obstacles of scaling up regional recipes are addressed. These issues include the procurement of ingredients, the uniformity of taste, and the maintenance of food safety. Through the use of case studies and the insights of industry professionals, it demonstrates creative ways to menu planning, techniques for cooking in batches, and the utilization of contemporary kitchen equipment in order to effectively offer meals that are distinctive to an area. The incorporation of regional cuisines into the production of large quantities of food not only caters to the interests of a wide range of consumers, but it also helps to preserve culinary traditions and provides economic support to local communities. Through the celebration of India's culinary heritage, this book promotes an approach to mass catering that is both environmentally responsible and culturally based.
