where the world turns wild: Speech and Silence in Contemporary Children's Literature

Danielle E. Price, 2023-10-31 *Speech and Silence in Contemporary Children's Literature* brings a fresh perspective to a central literary question— Who speaks?— by examining a variety of represented silences. These include children who do not speak, do not yet speak effectively, or speak on behalf of others. A rich and unexamined literary archive explores the problematics of children who are literally silent or metaphorically so because they cannot communicate effectively with adults or peers. This project centers children's literature in the question of voice by considering disability, gender, race, and ecocriticism. Children's literature rests on a paradox at the root of its own genre: it is produced by an adult author writing to a constructed idea of what children should be. By reading a range of contemporary children's literature, this book scrutinizes how such texts narrate the child's journey from communicative alterity to a place of empowered adult speech. Sometimes the child's verbal enclosure enables privacy and resistance. At other times, silence is coerced or imposed or arises from bodily impairment. Children may act as intermediaries, speaking on behalf of species that cannot. Recently, we have seen children exercise their voices on the world stage and as authors. In all cases, the texts analyzed here reveal speech as a minefield to be traversed. Children who talk too much, too little, or with insufficient expertise pose problems to themselves and others. Implicitly and sometimes explicitly, they attempt to hold adults to account— inside and outside the text. *Speech and Silence in Contemporary Children's Literature* addresses this underconceptualized subject in what will be an important text for scholars of children's literature, childhood studies, English, disability studies, gender studies, race studies, ecopedagogy, and education.

It draws on eco-critical philosophy and narrative theory to show ways in which the climate crisis is reorienting storytelling in the face of foreseeable human extinction. In the process, it argues that such stories have a role to play in helping us come to terms with the severity and scale of the crisis that we face.

where the world turns wild: *All The Wild That Remains* Edward Abbey, Wallace

Stegner, and the American West David Gessner, 2015-04-20 An homage to the West and to two great writers who set the standard for all who celebrate and defend it. Archetypal wild man Edward Abbey and proper, dedicated Wallace Stegner left their footprints all over the western landscape. Now, award-winning nature writer David Gessner follows the ghosts of these two remarkable writer-environmentalists from Stegner's birthplace in Saskatchewan to the site of Abbey's pilgrimages to Arches National Park in Utah, braiding their stories and asking how they speak to the lives of all those who care about the West. These two great westerners had very different ideas about what it meant to love the land and try to care for it, and they did so in distinctly different styles. Boozy, lustful, and irascible, Abbey was best known as the author of the novel *The Monkey Wrench Gang* (and also of the classic nature memoir *Desert Solitaire*), famous for spawning the idea of guerrilla actions—known to admirers as monkeywrenching and to law enforcement as domestic terrorism—to disrupt commercial exploitation of western lands. By contrast, Stegner, a buttoned-down, disciplined, faithful family man and devoted professor of creative writing, dedicated himself to working through the system to protect western sites such as Dinosaur National Monument in Colorado. In a region beset by droughts and fires, by fracking and drilling, and by an ever-growing population that seems to be in the process of loving the West to death, Gessner asks: how might these two farseeing environmental thinkers have responded to the crisis? Gessner takes us on an inspiring, entertaining journey as he renews his own commitment to cultivating a meaningful relationship with the wild, confronting American overconsumption, and fighting environmental injustice—all while reawakening the thrill of the words of his two great heroes.

where the world turns wild: *Wild Races* Lalruatkima,, 2024-01-05 This book analyzes the narrative dynamics of social formations in British India, using statistical and ethnographic records, visual cultures, and linguistic exercises to describe the British Empire's production of knowledge about so-called "strange new worlds." Lalruatkima then labels these narrative dynamics as "scripturalizing" to account for the creation, or writing, of these worlds into existence. This focus underscores empire as one of many such formations imagined against the backdrop of contested conversations about what it is and what it could be. When reverse engineered, empire throws into sharp relief its constituent narrative placeholders, and the sequences of meaning-making that connect them. Power differentials between the imperial center and frontier determine the placeholders and how they fit into the larger narrative. These discursive components in turn engender the politically charged attitudes and relations within the imperial domain. Lalruatkima excavates the imperial archive for material that accounts for these narrative dynamics.
