Lessons are interactive with many opportunities to jot down your thoughts and reactions, reflect on how a topic relates to your own experience, discuss with other people and become more involved with the material presented. Many people would, it seems. - Sex and Gender - do girls and boys, men and women behave so differently? If so, why? - Memory - how does memory work and how accurate is it? - Non-Verbal Communication - do we reveal our true feelings in our body language? - Development of Personality - what exactly is Anti-Social Personality Disorder? - Prejudice and Discrimination - are we bound to discriminate against people who are unlike us? - Learning - how to remove your fear of spiders/snakes/flying/open spaces or anything else using the principles of learning. - Aggression - is aggression born into us? Is it in our hormones? Or do we learn to fight? - Research Methods and the Ethics of Psychology - psychology is based on evidence, not just ideas. But what type of study constitutes good evidence and how should we treat the people in our studies?
