auto motor sport magazine: Water Lust Gerhard Pohle, 2024-07-19 Gerhard Pohle fell in love with the water when he was a child. His parents travelled widely, and he spent his formative years in Indonesia, Madagascar, and India, along with his native Germany. Snorkeling in tropical waters left the little boy with a fascination for marine life—an undertow that would keep pulling him back towards the sea. This water-loving child—who had only occasionally seen the inside of a classroom—would eventually earn a doctorate and become a marine biologist, but it would be far from easy. The journey would take another twenty years and cross five different continents. It would pit him against everything from an education system determined to discard him to a raging civil war. Rejections, heartbreaks, family crises, and his own crumbling self-esteem would test his resilience, but that resilience would never run dry for long. An unvarnished inspirational coming-of-age story about travel and family, about love, friendship, and loneliness, about being dismissed as “not worth teaching,” and about learning anyway—despite everything life throws at you.

For many years, the post-war recovery of Germany was an inspirational story. All of Europe looked on with admiration and envy as the nation rebuilt and set standards for the rest to follow. Companies such as Mercedes-Benz, Siemens and Bayer rose to become global titans, while the country's political leaders earned respect around the world - even their football teams were the best. Such was its success that when the Berlin Wall fell, it appeared to reunify almost seamlessly. Where Germany led, the rest followed. But, even at its zenith, there were signs of trouble, with a worrying lack of national identity at its heart. So, when events started to turn against Germany, the whole edifice began to crumble. As political and business leaders benefited from the status quo, they couldn't see the problems heading their way. Volkswagen's emissions fraud tainted its industrial reputation; abandoning nuclear power left the country at the mercy of Russia for its energy needs; and a growing divide between rich and poor stoked international tensions that opened the door to

the rise of the far-right AfD party. Journalists Chris Reiter and Will Wilkes have been reporting for years on the problems the country faces. Germany is not alone in this, but it is singularly ill-equipped to deal with them. Broken Republik is an essential read for anyone who wants to understand Germany's slide towards the brink.
