Whilst this book is primarily structured by the author's memories of living in his own Welsh childhood home during the 1970s - that is, the auto-ethnographic framework - it is as much about living anywhere amid the remembered cultural remnants of the past as it is immersing oneself in cultural geographies of the here-and-now. As a result, *Remembering the Cultural Geographies of a Childhood Home* is part of the ongoing pursuit by cultural geographers to provide a personal exploration of the pluralities of shared landscapes, whereby such an engagement with space and place aid our construction of cognitive maps of meaning that, in turn, manifest themselves as both individual and collective cultural experiences. Furthermore, touching upon our co-habiting of ghost topologies, *Remembering the Cultural Geographies of a Childhood Home* also encourages a critical exploration of children's spirituality amid the haunted cultural and geographical spaces and places of a house and its neighbourhood: the cellar, hallway, parlour, stairs, bedroom, attic, shops, cemeteries, and so on.

crystal tips and alastair: *Hybrid Practices in Moving Image Design* Iain Macdonald, 2016-10-07 This book, written from the perspective of a designer and educator, brings to the attention of media historians, fellow practitioners and students the innovative practices of leading moving image designers. Moving image design, whether viewed as television and movie title sequences, movie visual effects, animating infographics, branding and advertising, or as an art form, is being increasingly recognised as an important dynamic part of contemporary culture. For many practitioners this has been long overdue. Central to these designers' practice is the hybridisation of digital and heritage methods. Macdonald uses interviews with world-leading motion graphic designers, moving image artists and Oscar nominated visual effects supervisors to examine the hybrid moving image, which re-invigorates both heritage practices and the handmade and analogue crafts. Now is the time to ensure that heritage skills do not atrophy, but that their qualities and provenance are understood as potent components with digital practices in new hybrids.

crystal tips and alastair: The Story of British Animation Jez Stewart, 2021-08-26 A Sight & Sound Book of the Year Jez Stewart charts the course of this extraordinarily fertile area of British film from early experiments with stop-motion and the flourishing of animated drawings during WWI. He reveals how the rockier interwar period set the shape of the industry in enduring ways, and how creatives like Len Lye and Lotte Reiniger brought art to advertising and sponsored films, building a foundation for such distinctive talents as Bob Godfrey, Alison De Vere and George Dunning to unleash their independent visions in the age of commercial TV. Stewart highlights the integral role of women in the industry, the crucial boost delivered by the arrival of Channel 4, the emergence of online animation and much more. The book features 'close-up' analyses of key animators such as Lancelot Speed and Richard Williams, as well as more thematic takes on art, politics and music. It builds a framework for better appreciating Britain's landmark contributions to the art of animation, including Halas and Batchelor's *Animal Farm* (1954), Dunning's *Yellow Submarine* (1968) and the creations of Aardman Animations.

crystal tips and alastair: Horrifying Children Lauren Stephenson, Robert Edgar, John Marland, 2024-03-07 *Horrifying Children* examines weird and eerie children's television and literature via critical analysis, memoir and autoethnography. There has been an explosion of interest in the impact of children's television and literature of the late twentieth century. In particular, the 1970s, '80s and '90s are seen as decades that shaped a great deal of the contemporary cultural landscape. Television of this period dominated the world of childhood entertainment, drawing freely upon literature and popular culture, like the *Garbage Pail Kids* and *Stranger Things*, and much of it continues to resonate powerfully with the generation of cultural producers (fiction writers, screenwriters, directors, musicians and artists) that grew up watching the weird, the eerie and the horrific: the essence of 21st-century Hauntology. In these terms this book is not about children's television as it exists now, but rather as it features as a facet of memory in the 21st century. As such it is the legacy of these television programmes that is at the core of *Horrifying Children*. The 'haunting' of adults by what we have seen on the screen is crucial to the study. This collection directly addresses that which 'scared us' in the past inasmuch as there is a correlation between individual and collective cultural memory, with some chapters providing an opportunity for situating existing explorations and understandings of Gothic and Horror TV within a hauntological and experiential framework.

crystal tips and alastair: 1970s Childhood Liza Hollinghurst, 2019-03-21 A 1970s childhood was, for many, a life of happy-go-lucky freedom set against a soundtrack of pop music played on a transistor radio dangling from the handlebars of a Raleigh Chopper. It was a playground battlefield of *Sindy* versus *Action Man* or a dexterous display of how to handle *Clackers* without painfully rapping them across the knuckles. After-school television meant a choice of 'Blue Peter' or 'Magpie',

while chewing on an Aztec chocolate bar and flicking through Shoot or Jackie magazine. Yet it was also a decade of strikes, the three-day week and the Winter of Discontent which passed most children by unless a power cut meant no television. This fully illustrated book is a celebration of that childhood, its highs, lows and scraped knees, that will readily bring back the forgotten memories of a generation that grew up without mobile phones, the internet and 24-hour shopping.

crystal tips and alastair: The British Television Pilot Episodes Research Guide

1936-2015 Christopher Perry, 2015-12 A new idea can become an expensive flop for TV executives. So from the earliest days of television, the concept of a pilot episode seemed like a good idea. Trying out new actors; new situations and new concepts before making a series was good economical sense. It was also tax deductible. Sometimes these pilots were shown on television; sometimes they were so awful they were hidden from sight in archives; and sometimes they were excellent one-offs, but a series seemed elusive and never materialised. Chris Perry has always been fascinated by the pilot episode. So many pilots are made annually, but never seen by audiences. Only a handful appear on screen. It's a hidden world of comedy, variety, drama and factual programming. This volume attempts to lift the lid on the world of the TV pilot by revealing the many transmitted and untransmitted episodes made through the decades.
