great world history books: History's Greatest Lies William Weir, 2009-01-01 Get the real facts you weren't taught in school and learn how these myths have survived for so long. Discover the stories behind history's greatest lies and how—and why—the world's biggest whoppers have survived textbooks and lesson plans for years. For instance, did you know the conquistador Hernán Cortés wasn't as bloodthirsty as they say? Neither were the Goths, who were actually the most progressive of the Germanic tribes. Or, that a petty criminal with a resemblance to John Dillinger was probably assassinated instead of the notorious bank robber? In History's Greatest Lies, Weir sets the record straight through a fascinating examination of historical lies and myths and the true stories behind them. Each chapter pinpoints a misconception held as common truth in history. For example: Emperor Nero did not fiddle as Rome burned Paul Revere had plenty of help in his midnight ride In terms of prisons, the Bastille wasn't all that bad Weir explains why each lie persevered in our minds through ulterior motives, responsibility shirking, or exaggerations. You'll also discover the common threads that make up these falsehoods: the scapegoats, the spin needed to cast undeserving in a better light, and the frightful oversimplification of facts. Praise for History's Greatest Lies "Weir takes no prisoners—and tells no lies—in his continuously surprising and always fascinating new book. Great falsehoods have shaped history even more than great truths; the enduring fascination of this highly original volume is discovering how much of what we accept for fact is just plain wrong." —Joe Cummins, author of *The War Chronicles: From Chariots to Flintlocks* and *History's Greatest Untold Stories*

McNeill, Kenneth Pomeranz, 2015-04-16 Since 1750, the world has become ever more connected, with processes of production and destruction no longer limited by land- or water-based modes of transport and communication. The second book questions the extent to which the transformations of the modern world have been shared, focusing on social developments such as urbanization, migration, and changes in family and sexuality; cultural connections through religion, science, music, and sport; ligaments of globalization including rubber,

drugs, and the automobile; and moments of particular importance from the Atlantic Revolutions to 1989.

great world history books: We Are at War Book 5 Vitalis Chi Nwaneri, 2012-11-14 OUR MISSION Over the past century, the world has been witnessing a gradual decline in the state of global peace. At a recent conference of World Religious Leaders in Assisi, on the invitation of Pope Benedict XVI. These Leaders expressed the concern that the declining state of world peace is partly fueled by growing religious crises like terrorism across the globe. Accordingly, it was resolved that global religious leaders should strive to contribute to the recovery in global peace. Pope Benedict followed up the resolution with his establishment of the Pontifical Council on the New Evangelization --PCNE to stem the growing De-Christianization in most advanced countries and enhance the effectiveness of the weapon of Evangelization as a means of contributing to Global Peace and Religious Freedom. The Pope called on all the Lay Members of The Catholic Church to rise up and contribute to the mission of the PCNE. Our Mission is a humble response to the Popes call. In Book 1, the Author surveyed the teaching and history of the Church through a military perspective. He concluded that WE ARE AT WAR WITH SATAN, the only enemy of God and Man. That war started from the Garden of Eden after mans creation. It has been going on ever since. Author therefore reminds the world that its wars and crises, from the family to the global levels are rooted in this war against Satan, fighting us, as it did to Adam and Eve to commit sins by disobeying Gods Commandments. Through our disobedience and sins, we bring, as Adam did, wars and crises from our families to the global levels. Accordingly, the Author concludes that we cannot avoid sins if we do not understand the Teaching of Christ Our Only Leader and recognize the voice, language and strategies of His enemy, Satan in tempting us to sin. The Author views the teaching of Christ as the Pillars that sustain our lives and modern governance against the attacks of the enemy. He therefore warns that driving God out of our private and public lives can only move us faster on the path to wars, crises and declining global peace. He therefore provides in these Books his views on how to avoid sins by recognizing the ways that the enemy, Satan lures us to sin. Through such recognition, we can learn how to avoid its temptations. In the world of today, most sins arise from our denial or lack of knowledge of these sins at all levels of our activities and lives. The principle of the Separation of State and Religion is being misinterpreted to mean denying sins in our political, economic and social lives. In Books 2 and 3, the Author continues his surveys of the enemys strategies to cause wars between Christianity and Secularity and shows how the two can cooperate to fight back and reduce our wars and enhance global peace. In Book 4, he shows how the enemy uses us in our various professions to be its agents to cause wars that lead to a decline in peace from our family to the global levels. Finally, in Book 5 he surveys the on-going Warfront against our Religious Freedom to obey Gods Commandments in all our Religious and Secular activities.. He concludes with strong Recommendations on building the Knights of The Cross Mission of warriors from our Grass root parish levels of the church to the global level
