lord of the rings poster movie: Show Sold Separately Jonathan Gray, 2010-01-01 Highlights the trailers, merchandising and cultural conversations that shape our experiences of film and television. It is virtually impossible to watch a movie or TV show without preconceived notions because of the hype that precedes them, while a host of media extensions guarantees them a life long past their air dates. An onslaught of information from print media, trailers, internet discussion, merchandising, podcasts, and guerilla marketing, we generally know something about upcoming movies and TV shows well before they are even released or aired. The extras, or "paratexts," that surround viewing experiences are far from peripheral, shaping our understanding of them and informing our decisions about what to watch or not watch and even how to watch before we even sit down for a show. *Show Sold Separately* gives critical attention to this ubiquitous but often overlooked phenomenon, examining paratexts like DVD bonus materials for *The Lord of the Rings*, spoilers for *Lost*, the opening credits of *The Simpsons*, Star Wars action figures, press reviews for *Friday Night Lights*, the framing of *Batman Begins*, the videogame of *The Thing*, and the trailers for *The Sweet Hereafter*. Plucking these extra materials from the wings and giving them the spotlight they deserve, Jonathan Gray examines the world of film and television that exists before and after the show.

Not only is it the first in-depth corpus-based study to be based on Linear Unit Grammar, it is also the first study to present a unified model of both Linear Unit Grammar and Linear Unit Discourse Analysis. To illustrate this model, the book focuses on the role of discourse reflexivity in the linear structure of online message board discourse from the Internet Movie Database (IMDb) webpage. It is shown that discourse reflexivity plays a central role in the linear structure and antagonism characteristic of this type of discourse. This book will particularly appeal to those who have an interest in carrying forward the innovations in the description of grammar, lexis and discourse proposed by John Sinclair in his lifetime as well as to those with a specific interest in discourse reflexivity and computer-mediated communication.

Computers have changed since 1981, when The Soul of a New Machine first examined the culture of the computer revolution. What has not changed is the feverish pace of the high-tech industry, the go-for-broke approach to business that has caused so many computer companies to win big (or go belly up), and the cult of pursuing mind-bending technological innovations. The Soul of a New Machine is an essential chapter in the history of the machine that revolutionized the world in the twentieth century. lord of the rings poster movie: Music in Films on the Middle Ages John Haines, 2013-10-30 This book explores the role of music in the some five hundred feature-length films on the Middle Ages produced between the late 1890s and the present day. Haines focuses on the tension in these films between the surviving evidence for medieval music and the idiomatic tradition of cinematic music. The latter is taken broadly as any musical sound occurring in a film, from the clang of a bell off-screen to a minstrel singing his song. Medieval film music must be considered in the broader historical context of pre-cinematic medievalisms and of medievalist cinema's main development in the course of the twentieth century as an American appropriation of European culture. The book treats six pervasive moments that define the genre of medieval film: the church-tower bell, the trumpet fanfare or horn call, the music of banquets and courts, the singing minstrel, performances of Gregorian chant, and the music that accompanies horse-riding knights, with each chapter visiting representative films as case studies. These six signal musical moments, that create a fundamental visual-aural core central to making a film feel medieval to modern audiences, originate in medievalist works predating cinema by some three centuries.
